

# CONTENTS

Preface to Volume III . . . . .	Page xiii
---------------------------------	--------------

## Part 1

### NITRAMINES

#### CHAPTER I. GENERAL INFORMATION

Structure and chemical properties of nitramines . . . . .	1
Preparation of nitramines . . . . .	8
Direct nitration . . . . .	8
Indirect nitration . . . . .	10
Nitramines as explosives . . . . .	13
Literature . . . . .	13

#### CHAPTER II. ALIPHATIC NITRAMINES AND NITRAMIDES

Nitramine (nitramide) . . . . .	15
Methylnitramine . . . . .	16
Methylenedinitramine . . . . .	17
Ethylenedinitramine . . . . .	18
Other nitramines deriving from ethylenediamine . . . . .	20
Nitrocyanamide . . . . .	21
<b>Nitroguanidine</b> . . . . .	<b>22</b>
Physical properties . . . . .	23
Chemical properties . . . . .	25
Explosive properties . . . . .	29
The preparation of nitroguanidine . . . . .	31
Nitrourea . . . . .	33
Other aliphatic nitramines . . . . .	34
Dinitrodimethyloxamide (MNO) . . . . .	34
Dinitrodiethylloxamide . . . . .	35
Dinitrodimethylsulphamide . . . . .	36
Nitrodiethanolamine dinitrate (DINA) . . . . .	36
Dinitro-( $\beta$ -hydroxyethyl)-oxamide dinitrate (NENO) . . . . .	37
Dinitrodimethylamide of tartaric dinitrate . . . . .	37
Dinitrodi-( $\beta$ -hydroxyethyl)-sulphamide dinitrate . . . . .	38
Literature . . . . .	38

## CHAPTER III. AROMATIC NITRAMINES

Tetryl . . . . .	40
Nitration of dimethylaniline . . . . .	41
Nitration of dinitromethylaniline . . . . .	44
General rules for the preparation of tetryl . . . . .	47
Physical properties . . . . .	48
Chemical properties . . . . .	51
Explosive properties . . . . .	53
Toxicity . . . . .	56
Tetryl manufacture . . . . .	56
Homologues and analogues of tetryl . . . . .	62
The polycyclic analogues of tetryl . . . . .	68
Nitramino-esters of nitric acid . . . . .	70
Nitraminonitrophenols . . . . .	72
Nitramino-azoxy compounds . . . . .	73
Nitro methylene blue . . . . .	73
Literature . . . . .	74

## CHAPTER IV. HETEROCYCLIC NITRAMINES

Cyclonite . . . . .	77
Physical properties . . . . .	78
Chemical properties . . . . .	80
Explosive properties . . . . .	84
Toxicity . . . . .	86
Cyclonite manufacture . . . . .	87
1. The action of nitric acid on hexamine . . . . .	87
2. Preparation of cyclonite from hexamine, nitric acid and ammonium nitrate . . . . .	105
3. Preparation of cyclonite from sulphamic acid, formaldehyde and nitric acid . . . . .	107
4. Preparation of cyclonite from paraformaldehyde, ammonium nitrate and acetic anhydride . . . . .	109
5. Preparation of cyclonite from hexamine dinitrate, ammonium dinitrate and acetic anhydride . . . . .	111
The theory of cyclonite formation by methods 4 and 5 . . . . .	113
Octogen . . . . .	117
Homocyclonite . . . . .	119
Nitro derivatives of melamine . . . . .	120
Nitrosamines . . . . .	121
Literature . . . . .	125

## Part 2

## PRIMARY EXPLOSIVES: INITIATORS

## CHAPTER I. GENERAL INFORMATION

Literature . . . . .	131
----------------------	-----

## CHAPTER II. FULMINIC ACID AND ITS SALTS

Fulminic acid . . . . .	132
Mercury fulminate . . . . .	135

Physical properties . . . . .	136
Chemical properties . . . . .	139
Explosive properties . . . . .	146
Toxicity. . . . .	149
Mercury fulminate manufacture . . . . .	149
Other salts of fulminic acid . . . . .	157
Literature . . . . .	158

### CHAPTER III. HYDRAZOIC ACID AND ITS SALTS

Hydrazoic acid . . . . .	161
Lead azide . . . . .	169
Lead azide manufacture . . . . .	178
The continuous method of lead azide manufacture (according to Meissner) . . . . .	179
Silver azide . . . . .	182
Cupric azide . . . . .	185
Other metal azides . . . . .	185
Organic azides . . . . .	191
Literature . . . . .	196

### CHAPTER IV. OTHER INITIATING EXPLOSIVES

Diazo compounds . . . . .	201
Dinitrobenzenediazo-oxide (dinitrodiazophenol) . . . . .	201
The derivatives of aminoguanidine . . . . .	206
Tetrazene . . . . .	206
Nitrosoguanidine . . . . .	210
Cyanamide salts . . . . .	211
Nitrocyanamide salts . . . . .	211
Nitrophenol salts . . . . .	212
Lead picrate . . . . .	212
Lead styphnate . . . . .	213
Other styphnates . . . . .	220
Lead dinitroresorcinate . . . . .	220
Nitrosophenol salts . . . . .	221
Nitramine salts . . . . .	221
"Isonitramine" (nitrosohydroxylamine) salts . . . . .	221
Salts of metazonic acid . . . . .	224
Salts of oxalic acid . . . . .	224
Peroxides . . . . .	225
Acetylene and its salts (acetylides) . . . . .	227
Cuprous acetylde . . . . .	227
Silver acetylde . . . . .	229
Various initiators . . . . .	229
Nitrogen sulphide . . . . .	229
Nitrogen selenide . . . . .	229
Salts of thiocyanic acid . . . . .	230
Complex salts . . . . .	230
Silver perchlorate . . . . .	232
Initiating compositions . . . . .	232
The preparation of primer compositions . . . . .	235
compositions for explosive rivets . . . . .	240
Literature . . . . .	240

**Part 3****COMPOSITE EXPLOSIVES**

General information . . . . .	245
-------------------------------	-----

**CHAPTER I. HIGH EXPLOSIVES**

Fusible explosives . . . . .	247
Mixture of nitro compounds . . . . .	247
Mixtures with ammonium nitrate . . . . .	253
Manufacture and selection of fusible mixtures . . . . .	255
The phlegmatization of fusible mixtures . . . . .	257
Semi-fusible and infusible explosives . . . . .	258
Mixture with nitrates—mainly with ammonium nitrate . . . . .	259
Mixtures with aluminium and other metals . . . . .	266
Mixtures with chlorates and perchlorates . . . . .	274
Mixtures with potassium and ammonium perchlorates . . . . .	278
Plastic explosives . . . . .	281
Incompatibility in explosive mixtures . . . . .	283
Literature . . . . .	285

**CHAPTER II. LIQUID EXPLOSIVES**

Historical . . . . .	288
Mixtures with nitrogen dioxide, nitric acid and tetranitromethane . . . . .	288
Mixtures with hydrogen peroxide . . . . .	290
Mixtures with liquid oxygen (Oxyliquits) . . . . .	290
Liquid rocket propellants—propergols . . . . .	291
Mixture with nitrogen dioxide . . . . .	291
Mixture with nitric acid . . . . .	292
Hydrogen peroxide $H_2O_2$ . . . . .	299
Hydrazine . . . . .	305
1,1-Dimethylhydrazine (UDMH) . . . . .	308
Mixtures with liquid oxygen and ozone . . . . .	309
Nitric esters . . . . .	309
Ethylene oxide . . . . .	310
Attempts to increase the energy of liquid mixtures for rocket propulsion . . . . .	310
Mixtures with powdered metals . . . . .	311
Boron, silicon and beryllium compounds . . . . .	311
Organometallic compounds . . . . .	312
Fluorine and its derivatives . . . . .	312
Mixtures with perchloric acid . . . . .	313
Reactions of free atoms or radicals . . . . .	316
General considerations . . . . .	316
Final remarks . . . . .	318
Literature . . . . .	319

**CHAPTER III. BLACKPOWDER**

Historical . . . . .	322
Composition of blackpowder . . . . .	324
Types of blackpowder . . . . .	328

Modified blackpowder . . . . .	330
Theory of the burning of blackpowder . . . . .	335
Explosive properties of blackpowder . . . . .	340
The manufacture of blackpowder . . . . .	342
Raw materials . . . . .	342
Milling the ingredients . . . . .	345
Mixing the ingredients . . . . .	349
Pressing . . . . .	352
Corning . . . . .	354
Finishing . . . . .	356
Blending . . . . .	359
Cannon powder . . . . .	359
Safety in blackpowder factories . . . . .	361
Literature . . . . .	363

#### CHAPTER IV. COMPOSITE PROPELLANTS FOR ROCKETS

General information . . . . .	365
Mixtures with the salts of perchloric acid . . . . .	367
Mixtures of perchlorates with elastomers. Thiokol propellants . . . . .	368
The technology of the manufacture of rocket charges containing composite propellants with thiokol . . . . .	373
Mixtures of perchlorates with other elastomers . . . . .	380
Mixtures of perchlorates with plastics . . . . .	380
Mixtures with ammonium nitrate . . . . .	383
New method of mixing ingredients of composite propellants . . . . .	389
Various composite propellants and their characteristics . . . . .	392
Mixtures with ammonium picrate . . . . .	393
Explosive properties of composite propellants . . . . .	393
Literature . . . . .	393

#### CHAPTER V. MINING EXPLOSIVES

Research on the safety of mining explosives . . . . .	396
Safety explosives before World War I . . . . .	403
Conditions of shotfiring in mines . . . . .	406
Mining explosives used during World War I . . . . .	408
Research after World War I . . . . .	409
General consideration on safety of explosives . . . . .	413
Fundamental components of mining explosives . . . . .	420
Oxygen carriers . . . . .	421
Active ingredients and combustibles . . . . .	423
Oxygen balance . . . . .	423
Inert ingredients increasing safety . . . . .	427
Inert neutralizing agents . . . . .	432
Tests for mining explosives . . . . .	433
Transmission of detonation . . . . .	433
Sensitiveness to detonation . . . . .	434
Power of explosives . . . . .	438
Safety tests with methane and coal-dust . . . . .	439
Application of statistics to gallery testing of explosives . . . . .	445

Stability of mining explosives . . . . .	446
Mining explosives used in various countries . . . . .	446
Belgium . . . . .	447
Czechoslovakia . . . . .	448
France . . . . .	451
Germany . . . . .	455
Great Britain . . . . .	461
Hungary . . . . .	468
Japan . . . . .	468
Poland . . . . .	475
U.S.A. . . . .	480
U.S.S.R. . . . .	484
Combined blasting and water infusion for coal breaking . . . . .	489
Liquid oxygen explosives (Oxyliquits) . . . . .	491
Some other peaceful applications of explosives . . . . .	495
Literature . . . . .	495

#### CHAPTER VI. THE MANUFACTURE OF MINING EXPLOSIVES

The manufacture of ammonium nitrate explosives . . . . .	498
Ammonium nitrate-fuel oil mixtures . . . . .	508
The manufacture of dynamites . . . . .	511
The manufacture of chlorate and perchlorate explosives . . . . .	520
Cardox, Hydrox and Airdox cartridges . . . . .	521
Literature . . . . .	526

#### CHAPTER VII. SMOKELESS POWDER

Historical . . . . .	528
Properties of smokeless powder . . . . .	532
Physical properties . . . . .	532
Explosive properties . . . . .	532
Mechanical properties . . . . .	543
Flash and methods for suppressing it . . . . .	544
Smoke formation . . . . .	548
Erosiveness of smokeless powder . . . . .	548
Stability of smokeless powder . . . . .	550
Stability tests . . . . .	557
Stabilization of smokeless powder . . . . .	559
Stabilization with diphenylamine . . . . .	559
Inorganic stabilizers . . . . .	563
Organic stabilizers . . . . .	564
Apparent stabilizers . . . . .	567
Literature . . . . .	567

#### CHAPTER VIII. THE MANUFACTURE OF SMOKELESS POWDER

Introduction . . . . .	570
Nitrocellulose powder . . . . .	571
Nomenclature . . . . .	571
Manufacture of nitrocellulose powder . . . . .	573
The dehydration of nitrocellulose . . . . .	573

The preparation of nitrocellulose mixtures . . . . .	582
Partial dissolution of nitrocellulose . . . . .	583
Shaping the dough . . . . .	590
The stabilization of an unstable powder . . . . .	632
Ball-grain powder . . . . .	632
Nitrocellulose bulk powder (Schultze powder) . . . . .	640
Double base powders . . . . .	641
Nitroglycerine powders with a volatile solvent . . . . .	642
Solventless nitroglycerine powders . . . . .	644
Solventless powders with a low content of nitroglycerine . . . . .	652
The manufacture of <b>solventless</b> powder in German factories . . . . .	660
Solventless powder in Japan . . . . .	663
<b>Flashless</b> charges and <b>flashless</b> powders . . . . .	663
Smokeless powder with penthrite . . . . .	670
Smokeless powders containing nitroaliphatic compounds . . . . .	671
Smokeless powders for rockets . . . . .	671
Cast double base propellants . . . . .	675
General safety considerations in the manufacture of smokeless powder . . . . .	682
Literature . . . . .	686
Author index . . . . .	689
Subject index . . . . .	702
Errata to Volumes I and II . . . . .	715
