

CONTENTS

| | |
|---|---------|
| Preface | xv |
| Acknowledgments | xvii |
| Chapter | |
| 1. Introduction | 1 |
| 2. Chemical Characterization of Peats | 12-19 |
| 3. Solvent Extraction of Peat Bitumens | 21-36 |
| 4. Production of Peat Waxes | 39-60 |
| 5. Resin Component of Peat Bitumens | 63-72 |
| 6. Peat Carbohydrates: Composition and Hydrolysis | 75-92 |
| 7. Acid Hydrolysis of Unfractionated Peat | 94-101 |
| 8. Composition of Peat Hydrolysates Intended for Yeast Production | 104-110 |
| 9. Production of Organic Chemicals by Peat Hydrolysis | 112-117 |
| 10. Cultivation of yeast on Peat Hydrolysates | 119-130 |
| 11. Medicinal Products from Peat | 132-134 |
| 12. Humic Acids and Lignins | 136-165 |
| 13. Peat Pyrolysis and Coke Production | 168-192 |
| 14. Distillates and Gases from Peat Pyrolysis | 193-201 |
| 15. Activated Carbon from Peat | 202 |
| 16. Chemical Methods of Peat Analysis | 206-232 |
| 17. Scale of Peat Chemical Operations | 234-239 |
| 18. Technological Perspectives for Peat Chemicals | 244-245 |
| References | 248 |
| Index | 265 |
