

CONTENTS

VOLUME I

CHAPTER	PAGE
1 THE ORIGIN OF COAL— <i>Thomas A. Hendricks, Geologist, Geological Survey, United States Department of the Interior</i>	1
2 CLASSIFICATION OF COAL— <i>Harold J. Rose, Vice-President, Anthracite Industries, Inc.</i>	25
3 COAL PETROGRAPHY— <i>Gilbert H. Cady, Senior Geologist and Head of Coal Division, Illinois State Geological Survey</i>	86
4 CALORIFIC VALUE OF COAL— <i>W. A. Selvig, Supervising Chemist, Coal Constitution and Miscellaneous Analysis Section, Central Experiment Station, Bureau of Mines, Pittsburgh, Pa., and F. H. Gibson, Assistant Chemist, Central Experiment Station, Bureau of Mines, Pittsburgh, Pa.</i>	132
5 HARDNESS, STRENGTH, AND GRINDABILITY OF COAL— <i>H. F. Yancey, Supervising Engineer, and M. R. Geer, Assistant Mining Engineer, Northwest Experiment Station, Bureau of Mines, Seattle, Wash.</i>	145
6 PLASTIC, AGGLUTINATING, AGGLOMERATING, AND SWELLING PROPERTIES OF COALS— <i>R. E. Brewer, Chemical Engineer, Central Experiment Station, Bureau of Mines, Pittsburgh, Pa.</i>	160
7 PHYSICAL PROPERTIES OF COALS— <i>Louis C. McCabe, Illinois State Geological Survey, Urbana (on leave), and Charles C. Boley, Illinois State Geological Survey, Urbana</i>	310
✓ 8 CHEMICAL CONSTITUTION OF COAL: AS DETERMINED BY HALOGENATION REACTIONS— <i>J. F. Weiler, Coal Research Laboratory, Carnegie Institute of Technology</i>	337
9 CHEMICAL CONSTITUTION OF COAL: AS DETERMINED BY OXIDATION REACTIONS— <i>H. C. Howard, Coal Research Laboratory, Carnegie Institute of Technology</i>	346
→ 10 CHEMICAL CONSTITUTION OF COAL: AS DETERMINED BY REDUCTION REACTIONS— <i>J. F. Weiler, Coal Research Laboratory, Carnegie Institute of Technology</i>	377
11 CHEMICAL CONSTITUTION OF COAL: AS DETERMINED BY HYDROLYTIC REACTIONS— <i>H. C. Howard, Coal Research Laboratory, Carnegie Institute of Technology</i>	418
* 12 FORMS OF SULFUR IN COAL— <i>Gilbert Thiessen, Koppers Company, Pittsburgh, Pennsylvania</i>	425
13 THE OCCURRENCE OF NITROGEN IN COAL— <i>W. R. Kirner, Coal Research Laboratory, Carnegie Institute of Technology</i>	450

CHAPTER		PAGE
14	COMPOSITION AND ORIGIN OF THE MINERAL MATTER IN COAL— <i>Gilbert Thiessen, Koppers Company, Pittsburgh, Pennsylvania</i>	485
15	THE FUSION, FLOW, AND CLINKERING OF COAL ASH: A SURVEY OF THE CHEMICAL BACKGROUND— <i>Elliott P. Barrett, Senior Industrial Fellow, Mellon Institute of Industrial Research, Pittsburgh, Pennsylvania</i>	496
16	THE CLEANING OF COAL— <i>H. F. Yancey, Supervising Engineer, and M. R. Geer, Junior Mining Engineer, Northwest Experiment Station, Bureau of Mines, Seattle, Washington</i>	572
17	CONDITION OF WATER IN COALS— <i>A. W. Gauger, Professor of Fuel Technology and Director of Mineral Industries Research, The Pennsylvania State College</i>	600
18	CHANGES IN COAL DURING STORAGE— <i>L. D. Schmidt, Chemist, Central Experiment Station, U. S. Bureau of Mines, Pittsburgh, Pennsylvania</i>	627
19	THE ACTION OF SOLVENTS ON COAL— <i>M. W. Kiebler, Coal Research Laboratory, Carnegie Institute of Technology</i>	677
20	VACUUM DISTILLATION OF COAL— <i>H. C. Howard, Coal Research Laboratory, Carnegie Institute of Technology</i>	761
21	INDUSTRIAL COAL CARBONIZATION— <i>Fred Denig, Vice-President, Koppers Company, Pittsburgh, Pennsylvania</i>	774
*22	DEPENDENCE OF YIELDS OF PRODUCTS ON TEMPERATURE AND RATE OF HEATING— <i>Joseph D. Davis, Senior Fuels Chemist, Central Experiment Station, Bureau of Mines, Pittsburgh, Pennsylvania</i>	834
23	PRETREATMENT OF COAL FOR CARBONIZATION— <i>H. H. Lowry, Coal Research Laboratory, Carnegie Institute of Technology</i>	848
24	THE PHYSICAL PROPERTIES AND REACTIVITY OF COKE— <i>Martin A. Mayers, Coal Research Laboratory, Carnegie Institute of Technology</i>	863

VOLUME II.

25	GAS FROM COAL CARBONIZATION—PREPARATION AND PROPERTIES— <i>Alfred R. Powell, Koppers Company, Pittsburgh, Pennsylvania</i>	921
26	REMOVAL OF SULFUR COMPOUNDS FROM COAL GAS— <i>Herbert A. Gollmar, Koppers Company, Pittsburgh, Pennsylvania</i>	947
27	RECOVERY OF AMMONIA, CYANOGEN, PYRIDINE, AND OTHER NITROGENOUS COMPOUNDS FROM INDUSTRIAL GASES— <i>William H. Hill, Mellon Institute of Industrial Research</i>	1008
28	LIGHT OIL FROM COKE-OVEN GAS— <i>William L. Glowacki, Koppers Company Industrial Fellow, Mellon Institute of Industrial Research</i>	1136
29	REMOVAL OF MISCELLANEOUS CONSTITUENTS FROM COAL GAS— <i>Alfred R. Powell, Koppers Company, Pittsburgh, Pennsylvania</i>	1232
30	UTILIZATION OF COAL GAS— <i>Louis Shnidman, Chief Chemist and Laboratory Director, Rochester Gas & Electric Corporation, Rochester, New York</i>	1252
31	THE CHEMICAL NATURE OF COAL TAR— <i>E. O. Rhodes, Koppers Company, Pittsburgh, Pennsylvania</i>	1287

CO TENTS

xiii

PAGE

CHAPTER

32	AMMONIACAL LIQUOR— <i>P. J. Wilson, Jr., Senior Industrial Fellow, and Joseph H. Wells, Industrial Fellow, Carnegie-Illinois Steel Corporation Fellowship, Mellon Institute</i>	1371
33	COMBUSTION IN FUEL BEDS— <i>M. A. Meyers, Coal Research Laboratory, Carnegie Institute of Technology</i>	1482
34	THE COMBUSTION OF PULVERIZED COAL— <i>A. A. Orning, Coal Research Laboratory, Carnegie Institute of Technology</i>	1522
35	DIRECT GENERATION OF ELECTRICITY FROM COAL AND GAS (FUEL CELLS)— <i>H. C. Howard, Coal Research Laboratory, Carnegie Institute of Technology</i>	1588
36	PRODUCERS AND PRODUCER GAS— <i>B. J. C. van der Hoeven, General Superintendent, Koppers Company, Pittsburgh, Pennsylvania</i>	
37	WATER GAS— <i>Jerome J. Morgan, Professor of Chemical Engineering, Columbia University</i>	1673
38	HYDROGENATION OF COAL AND TAR— <i>H. H. Storch, Principal Physical Chemist, Central Experiment Station, Bureau of Mines, Pittsburgh, Pennsylvania</i>	1750
39	SYNTHESIS OF HYDROCARBONS FROM WATER GAS— <i>H. H. Storch, Principal Physical Chemist, Physical Chemistry Section, Central Experiment Station, Pittsburgh, Pennsylvania</i>	1797
40	METHANOL SYNTHESIS FROM WATER GAS— <i>L. L. Hirst, Senior Chemist, Physical Chemistry and Hydrogenation Section, Central Experiment Station, Bureau of Mines, Pittsburgh, Pennsylvania</i>	1846
	BOOK INDEX	xv
	NAME INDEX	xxiii
	SUBJECT INDEX	lxvii
