

Contents and Subject Index

INTRODUCTION.....	1
COAL RESOURCES.....	3.....
✓ CHEMISTRY OF COAL LIQUEFACTION.....	8
✓ GENERAL OVERVIEW OF COAL LIQUEFACTION PROCESSES	13
Introduction	13
Pyrolysis.....	15
Solvent Extraction	17
Catalytic Liquefaction.....	18
Indirect Liquefaction.....	20
PYROLYSIS.....	22
COED Process	22
Introduction	22
Process Description.....	22
History of the Process.....	26
Economic Considerations.....	27
Analysis of Syncrude	28
Chemicals from Syncrude	29
Clean Coke Process.....	32
Introduction	32
Process Description.....	32
History of the Process	34
Economic Considerations.....	34
Recent Developments.....	35
Toscoal Process	39
Introduction	39
Process Description	39
History of the Process	40
Occidental Flash Pyrolysis Process.....	41
Introduction	41
Process Description	41
Status of the Process.....	43
Recent Developments.....	43
Coalcon Hydrocarbonization Process.....	47
Introduction	47

Process Description	48
History of the Process	51
Status of the Process.....	52
Oak Ridge Hydrocarbonization Process	52
Introduction	52
Process Description	53
History of the Process	54
Recent Developments.....	54
Flash Hydropyrolysis Process for Conversion of Lignite	58
Introduction	58
Process Description	58
Economic Considerations.....	64
Flash Hydrogenation Process.....	67
Introduction	67
Process Description	68
History of the Process	68
Recent Developments.....	70
Lurgi-Ruhrgas Flash Carbonization Process.....	71
Introduction	71
Process Description	72
References.....	73
SOLVENT EXTRACTION.....	76
Solvent Refined Coal Process	76
Introduction	76
Process Description	77
History of the Process.....	79
Ft. Lewis Pilot Plant.....	80
Wilsonville Pilot Plant.....	82
Recent Activities.....	84
SRC Combustion Test Program.....	94
Consol Synthetic Fuel Process.....	96
Introduction	96
Process Description	97
History of Project	99
Cresap Pilot Plant.....	100
Energy Balance.....	102
Recent Activities.....	102
Exxon Donor Solvent Process.....	104
Introduction	104
Process Description	105
History of the Project.....	107
Recent Developments.....	108
CO-Steam Process.....	114
Introduction	114
Process Description	114
History of the Process.....	116
/Conversion of Lignite to Product Fractions.....	117
Supercritical Gas Solvent Extraction	119
Introduction	119
Process Description	119
UOP Solvent Extraction	120
Status of the Process.....	120
Process Description	120

References.....	121
CATALYTIC LIQUEFACTION.....	123
H-Coal Process.....	123
Introduction	123
Process Description	124
History of the Process.....	127
Trenton Pilot Plant.....	129
Recent Developments.....	131
Chemical from H-Coal Oil	133
Synthoil Process.....	137
Introduction	137
Process Description	137
History of the Process.....	139
Recent Developments.....	140
Clean Fuel from Coal Process.....	141
Introduction	141
Process Description	142
Status of the Process.....	144
Recent Developments.....	145
Zinc Halide Coal Liquefaction Process.....	147
Introduction	147
Process Description	147
History of the Process.....	152
Economic Considerations.....	152
Recent Developments.....	153
Dow Coal Liquefaction Process.....	155
Introduction	155
Process Description	156
Development Plans.....	159
References.....	159
INDIRECT LIQUEFACTION.....	161
Fischer-Tropsch Process.....	161
Introduction	161
Process Description	161
History of the Process.....	162
SASOL Commercial Plant	163
Mobil M-Gasoline Process.....	168
Introduction	168
Fixed Bed Pilot Plant.....	168
Fluid Bed Pilot Plant.....	170
Analytical Procedures.....	172
Characterization of Gasoline Produced from Methanol.....	174
Badger Conceptual Design.....	178
Summary	179
References.....	181
COAL LIQUIDS FROM THE H-COAL PROCESS.....	183
Introduction.....	183
History of Overhead Products.....	183
Analytical Methods.....	184
Analytical Results.....	187
Physical Property of Products.....	187

Preparation of Distillates	190
Separation and Characterization of the <203°C and <197°C Distillates	192
Separation and Characterization of >203°C and >197°C Distillates.....	193
Saturates	195
Monoaromatics	195
Diaromatics.....	196
Polyaromatics.....	196
Summary	197
References.....	197
COMMERCIAL SCALE EXPANDED-BED HYDROPROCESSING OF SOLVENT REFINED EXTRACT	199
Introduction	199
Process Description	200
History of the Project	201
Recent Activities	201
ECONOMIC ANALYSIS OF SRC PROCESS.....	206
Introduction.....	206
Financial Analysis.....	207
Process Description	207
Coal Supply	209
Coal Receiving, Stockpiling, and Reclaiming.....	209
Coal Preparation, Drying, and Grinding.....	209
Liquefaction Process.....	210
Fuel Oil Hydrogenation	210
Naphtha Hydrogenation.....	211
Stack Gas Desulfurization	211
Gasifier	211
Hydrogen Manufacture.....	212
Water Treatment	212
Capital Investment	212
Operating Cost.....	214
Unit Cost.....	214
Reference.....	217
ENGINEERING ASSESSMENT OF THE SYNTHOIL PROCESS.....	218
Introduction.....	218
Feed Slurry Pumping and Heating	218
Reactor Design.....	220
Pressure Vessel	220
Heat Removal	223
Flow Distribution.....	225
Removal of Spent Catalyst.....	226
Heat Recovery	227
Solids-Liquids Separation.....	228
Low-Temperature Carbonization.....	230
Gasification.....	231
Overall Reliability	231
References.....	232
FISCHER-TROPSCH COMPLEX CONCEPTUAL DESIGN AND ECONOMIC ANALYSIS	233
Introduction.....	233

Summary	235
Unit Descriptions.....	237
Coal Mine.....	238
Coal Preparation.....	238
Coal Storage, Grinding and Drying.....	238
Process Gasification.....	241
Heat Recovery and Gas Cleaning.....	244
Acid Gas Removal.....	244
Shift Conversion.....	245
Fischer-Tropsch Synthesis.....	245
Methanation.....	247
Liquid Products Recovery	248
Chemical Recovery	251
Oxygen Plant	251
Sulfur Recovery.....	251
Water Reclamation.....	252
Steam Distribution	253
Shops and Buildings.....	253
Fire Water System	253
Power Generation	254
Potable and Sanitary Water Systems	254
Raw Water System	254
Plant Flare Systems	255
Product Storage	255
Effluent Water Treating	255
Material and Energy Balance.....	256
Economic Considerations	259
Fixed Capital Investment	259
Total Capital Requirements.....	260
Operating Cost	260
Financial Parameters	262
Possible Product Market Values.....	263
EQUIPMENT AND MATERIALS IN COAL LIQUEFACTION PROCESSES.....	266
Introduction.....	266
Pumps.....	267
General.....	267
Slurry Pumps.....	267
Product Pumps.....	272
Filter Aid Pumps.....	273
Heat Exchangers.....	274
General.....	274
Reactor Effluent Coolers.....	274
Vapor Condensers.....	277
Product Solidifiers.....	277
Fired Heaters	278
General.....	278
Slurry Preheaters	278
Solids-Liquid Separation.....	283
General.....	283
Filters.....	285
Centrifuges.....	290
Hydroclones.....	292

Fluid Coking for Recovery of Coal Liquids.....	294
Vessels.....	297
Piping System.....	298
Instrumentation.....	299
General.....	299
High Pressure Letdown.....	299
Recent Developments.....	300
Metallurgy.....	301
Design Consideration.....	301
Corrosion and Erosion.....	303
ENVIRONMENTAL, HEALTH AND SAFETY CONSIDERATIONS.....	307
Introduction.....	307
Environmental, Health and Safety Problems.....	308
Pollutant Releases.....	308
Physical Disturbances.....	308
Plant Construction, Operation and Decomission.....	311
Issues and Requirements.....	311
Impact on Air Quality.....	312
Impact on Water Quality.....	312
Impact on Human Health.....	313
Impact on Ecosystems.....	314
Solid Waste Management and Land Use Impact.....	314
Occupational Hazard.....	315
Hazards Associated with Processing, Transfer and Storage of Products.....	316
Socioeconomic Impact.....	316
Assessment and Application of Environmental Health and Safety Data.....	316
Federal Environmental Legislation Applicable to Coal Liquefaction Facilities.....	317
COMPARISON OF COAL LIQUEFACTION PROCESSES.....	320
Introduction.....	320
Technical Comparison.....	321
Process Descriptions.....	321
Feedstock Requirements.....	322
Reactor Systems.....	322
Products.....	323
Probability of Commercial Success.....	323
Fischer-Tropsch Process.....	324
Mobil M-Gasoline Process.....	324
H-Coal Process.....	325
Exxon Donor Solvent Process.....	325
Solvent Refined Coal Process.....	326
Economic Comparison.....	326
Product Value.....	327
Capital Cost.....	327
Cost Comparison.....	329
Conclusions.....	331
