contents.....	3
about the authors	8
Jon Hallé and Dan Carter	8
Dave Darby	8
Phillip Hunt.....	8
disclaimer	9
introduction.....	10
what is biodiesel?.....	12
different kinds of plant oils	14
waste vegetable oil	15
biofuels and fossil fuels	16
benefits of biodiesel.....	18
CO ₂ emissions and global warming.....	18
what is global warming?.....	18
the 'greenhouse' gases.....	19
water vapour	19
methane (CH ₄)	19
nitrogen oxides (NO _x)	19
CFCs.....	19
carbon dioxide (CO ₂).....	19
is it really increasing?.....	20
what problems does it cause?	20
what can we do about it?	21
emissions of pollutants	22
nitrogen oxides (NO _x)	23
sulphur dioxide (SO ₂)	23
carbon monoxide (CO).....	24
hydrocarbons.....	25
particulates.....	25
volatile organic compounds (VOCs)	26
toxic organic micropollutants (TOMPs).....	26
lead and heavy metals.....	27
secondary pollution problems.....	27
acid deposition.....	27
ozone	28
comparison of petrodiesel / biodiesel emissions.....	29
nitrogen oxides (NO _x)	29
sulphur dioxide (SO ₂).....	30
carbon monoxide (CO).....	30
hydrocarbons.....	31

particulates.....	31
volatile organic compounds (VOCs).....	31
toxic organic micropollutants.....	31
lead.....	31
acid deposition.....	31
ozone.....	32
other environmental benefits.....	32
positive energy balance.....	32
energy density.....	33
biodegradable.....	33
local.....	33
spills.....	34
non-toxic for environment.....	34
utilizing a waste product.....	34
production by-products.....	35
but biodiesel isn't <i>necessarily</i> green.....	35
health benefits.....	36
emissions.....	36
toxicity.....	36
safety.....	37
benefits for the vehicle.....	37
lubricity.....	37
cetane number.....	38
other benefits.....	38
the Diesel engine.....	40
development of the Diesel engine.....	41
the modern Diesel engine.....	41
the Diesel cycle.....	42
fuel injection.....	43
indirect injection (IDI).....	43
direct Injection (DI).....	43
fuel systems.....	43
mechanically-controlled fuel injection.....	44
electronically-controlled fuel injection.....	44
fuel pipes, filters and seals.....	45
turbocharging.....	45
issues with using biodiesel.....	45
mileage.....	45
cold starting.....	46
biodiesel acting as a solvent.....	47
fuel quality.....	47
engine warranties.....	48
biodiesel chemistry primer.....	49

the building blocks	49
chains.....	50
alkanes.....	51
alkenes.....	52
alkynes.....	52
functional groups.....	52
alcohols.....	53
fatty acids.....	53
esters	54
putting it all together.....	54
transesterification.....	57
free fatty acids.....	58
making biodiesel.....	59
health and safety	59
risk analysis	59
dangerous chemicals.....	59
slippery oils	61
heavy containers.....	61
application of heat.....	61
electricity	62
other sensible precautions.....	62
making simple biodiesel	62
raw materials.....	63
feedstock.....	63
alcohol.....	64
lye.....	64
equipment.....	65
the process	67
step 1: WVO pre-treatment.....	67
step 2: titrate	67
step 3: mix methoxide	70
step 4: reaction.....	71
step 5: settle.....	71
step 6: separate	71
step 7: test.....	72
step 8: wash the fuel	72
step 9: filter and de-water the fuel.....	74
step 10: deal with the by-products	74
practical biodiesel making: a 100-litre batch reactor.....	74
materials	75
oil preparation.....	76
methoxide preparation	77
the reaction.....	78

methanol recovery.....	79
settling.....	80
water washing and dewatering.....	81
fuel dispensing.....	82
variations on the basic method.....	82
2-stage basebase method.....	82
2-stage acidbase method.....	83
what to do with the glycerine.....	83
purification.....	85
burning.....	85
composting.....	85
soap making.....	85
storage.....	86
biodiesel standards.....	86
EN14214.....	87
explanations.....	89
potential for different scales of production.....	90
scenario 1: I want to make biodiesel for myself.....	90
scenario 2: I want to make biodiesel for sale.....	91
scenario 3: we want to form a fuel club or co-op.....	92
scenario 4: I want to form a biodiesel purchasing co-op.....	92
scenario 5: I want to start a commercial biodiesel operation.....	93
regulations.....	95
Customs & Excise.....	95
Environment Agency.....	97
planning permission.....	98
Health & Safety Executive.....	98
insurance.....	99
weights and measures.....	99
the future.....	100
resources.....	101
biodiesel manufacturers / suppliers.....	101
equipment.....	101
waste oil.....	102
winterising agents.....	102
chemical suppliers.....	103
recipes.....	103
laboratory testing services (accredited).....	103
Customs & Excise.....	103
Environment Agency.....	104
health & safety.....	104
planning permission.....	105
weights and measures.....	105

insurance	105
trade associations.....	105
engine warranties.....	105
engine conversions for straight veg. oil.....	106
books	106
courses	106
web	106
appendices	108
appendix 1: technical description of biodiesel.....	109
appendix 2: fuel options	110
emulsions.....	110
straight vegetable oil	111
two-tank method.....	111
one-tank method	111
appendix 3 ILO health & safety datasheets.....	113
notes.....	122
