

CONTENTS

1.	Introduction: Background of Current Interest	1
2.	Preparation of Coal-Oil Mixtures	13
	Pulverizing Coal	17
	Forming the Oil- or Water-Coal Colloid	25
	COM of Moderate Concentration	27
	COM of High Concentration	34
	Viscosity and In-plant Handling	39
	Long-range Transport	53
	Monitoring Fuel Characteristics	55
	Particle Size in COM	56
	Sedimentation	57
	Fluidity	61
3.	Coal-Oil Mixture Combustion Characteristics and Problems ...	67
	Fuel Heating, Flow and Atomization	70
	Burners and Combustion	79
	COM Combustion Products	90
	Heat Exchange Equipment and Boiler Properties	94
	Pollution Control	99
4.	Economic Considerations	109
	Costs of Switching to COM from Oil	110
	Investment Value for COM	113
5.	Review of Coal-Oil Mixture Program Status	121
	U.S. Government-Sponsored Industrial Development Projects	121
	University Research Projects	124
	Other U.S. Projects	124
	Foreign Projects	126
	United Kingdom	126
	Canada	126
	Japan	126
	Appendix A: Characterization of Viscous Flow Properties	129
	Appendix B: Summary of Final Report on General Motors COM Project, 1975-1977	133
	References	141
	Index	145
