

CONTENTS

Preface	iii
Editor's Note	vii
Contributors	xi
Part I INTRODUCING	
10 Origin, Occurrence, and Recovery	1
2. Terminology and Classification	51
3. Composition and Properties	71
4. Fractionation	121
5. Refining: Distillation	149
6. Refining: Thermal Methods	165
7. Refining: Treatment Methods	203
8. Refining Heavy Feedstocks	229
9. Catalysts	251
10. Petroleum Products	261
11. Chemicals from Petroleum	277
Part II. TAR SANDS	
12. Origin, Occurrence, and Recovery	317
13. Tar Sand Composition and Properties	375
14. Bitumen Composition and Properties	387
15. Bitumen Upgrading	411
16. Current and Future Development	419
Part III. COAL	
17. Origin, Occurrence, and Recovery	437
18. Terminology and Classification	543
19. Composition	573
20. Coking and Carbonization	645
21. Combustion	655
22. Gasification	661
23. Liquefaction	735
24. Chemicals from Coal	763
Part IV. OIL SHALE	
25. Origin, Occurrence, and Recovery	795
26. Characterization, Testing, and Classification of Oil Shales	839

27. Physical/Chemical Properties	855
28. Chemical Structure of Kerogen	877
29. Retorting	911
30. Shale Oil Refining	1005
31. Chemicals from Shale Oil	1031
	1039
Part V. NATURAL GAS	
32. Origin, Occurrence, and Recovery	1055
33. Definitions and Terminology	1087
34. Composition and Properties	1095
35. Processing : General Concepts	1099
36. Processing: Specific Processes	1113
37. Chemicals from Natural Gas	1165
Index	1165
