

CONTENTS

LIST OF CONTRIBUTORS	xi
PREFACE	xiii
Chapter I A Wealth of Waste; a Shortage of Energy	
<i>Larry L. Anderson</i>	
I. Introduction	2
II. Quantities and Sources of Organic Wastes	4
III. Energy Potential from Organic Wastes, 1976 and 1980	9
IV. Availability of Organic Wastes as Energy Sources	10
V. Conclusion	15
References	15
Chapter II Energy from Wastes: An Overview of Present Technologies and Programs	
<i>David A. Tillman</i>	
I. Introduction	17
II. Waste as an Energy Ore	18
III. Energy Recovery Systems for Urban Waste	20
IV. Technology Evaluation	32
V. Technology Implementation Analysis	35
VI. Conclusion	38
References	39
Chapter III Production of Low-BTU Gas from Wastes, Using Molten Salts	
<i>S. J. Yosim and K. M. Barclay</i>	
I. Introduction	41
II. Concept of Gasification of Wastes with Molten Salt to Produce Low-BTU Gas	42
	vii

III. Experimental Section	44
IV. Gasification Results	48
V. Conclusion	54

Chapter IV **Pipeline Gas from Solid Wastes by the Syngas Recycling Process**

*Herman F. Feldmann, G. W. Felton, H. Nack,
and J. Adlersrein*

I. Introduction	57
II. The Process Concept	59
III. Experimental Studies	61
IV. Summary of Experimental Results	65
V. Conclusions and Recommendations	72
References	72

Chapter V **The Nature of Pyrolytic Oil from Municipal Solid Waste**

Kennerh W. Pober and H. Fred Bauer

I. Introduction	73
II. The Process	74
III. Product Oil Characteristics	76
IV. Char and Gas Products	84
V. Conclusion	85

Chapter VI **The Conversion of Feedlot Wastes into Pipeline Gas**

Frederick T. Varani and John J. Burford, Jr.

I. Introduction	87
II. Process Selection	90
III. The Anaerobic Digestion Process	92
IV. Conclusion	103
References	104

Chapter VII **Fuels and Chemicals from Crops**

Henry R. Bungay and Roscoe F. Ward

I. Introduction	105
II. Biomass Sources	106
III. Establishing the Energy Farm	110
IV. Implications of Energy Farming	118
V. Conclusion	120

Chapter VIII The Production of Oil from Wood Waste*Herbert R. Appell*

I. Introduction	121
II. Reactants	123
III. Operating Variables	129
IV. Stoichiometry of Wood Conversion	135
V. Economics	136
VI. Product Characteristics	136
VII. Mechanistic Studies	137
VIII. Conclusion	139
References	139

Chapter IX Fuels from Wood Waste*Fred Shafizadeh*

I. Introduction	141
II. Chemical Composition	143
III. Pyrolysis and Combustion	144
IV. Heat Content	149
V. Evaluation	152
VI. Commercialization	156
VII. Conclusion	158
References	158

Chapter X Pyrolytic Gasification of Kraft Black Liquors*K. T. Liu, E. P. Stambaugh, H. Nack,
and J. H. Oxley*

I. Introduction	161
II. The Concept	162
III. Research Experiments and Results	163
IV. Conclusions and Discussion	168
References	168

Chapter XI Methanol Production from Organic Waste*G. Haider*

I. Introduction	171
II. Methanol Production Considerations	174
III. Manufacturing Processes of Methanol	186
IV. Conclusion	191
References	192

Chapter **XII** Utilization of Energy from Organic Wastes
through Fluidized-Bed Combustion

G. Ray Smithson, Jr.

I. Introduction	195
II. General Description of Technology	196
III. Energy Utilization	200
IV. Application of Fluidized-Bed Technology	201
V. Conclusion	209

Chapter **XIII** Nontechnical Issues in the Production of Fuels
from Waste

David A. Tillman

I. Introduction	211
II. Feedstock Accumulation	212
III. Product Marketing	215
IV. Financing Fuels from Waste	218
V. Conclusion	225
References	226
