

Contents

- About the authors 5
- Introduction 7
- Anaerobic digestion: the technical options Leo Pyle 9
- Alternative systems based on anaerobic digestion: digester designs 31
 - Alternative treatment systems centred on biogas 43
 - Technical parameters affecting digester performance 49
 - State-of-the-art review 50
 - Research and development priorities: some suggestions 65
- Biogas technology: a social and economic assessment Andrew **Barnett** 67
- The general approach 68
 - Valuation of common inputs and outputs 78
 - Case studies 84
 - The social and economic determinants of the demand for biogas 92
 - An approach to research priorities 95
- Biogas systems in Asia: a survey S.K. Subramanian 97
- India 97
 - The Republic of Korea 101
 - The Philippines 102
 - Thailand 104
 - Indonesia 105
 - Japan 105
 - Other countries 106
 - Interest of the international agencies in Asia 108
 - Technological aspects of the region's experience 108
 - Social and economic issues 114
 - Problems of evaluation 119
 - Summary 120
- Appendix 1. Continuous digestion: typical gas yields **123**
- Appendix 2. **Continuous/batch** digester rates: some models and results **124**
- Cellulose digestion **125**
- Appendix 3. Suggestions for studies in core technology **126**
- Bibliography **127**
