

Table of Contents

1. INTRODUCTION	1
ENERGY SCENE	
WORLD ENERGY CONSUMPTION TRENDS	
GNP AND ENERGY GROWTH	
CORPORATE ENERGY PLAN	
ORGANISATION FOR ENERGY CONSERVATION	
2. STORAGE AND HANDLING OF FUELS	9
FUEL OIL	
- Calibration of Storage Tanks	
- Draining of Water and Cleaning of Storage Tanks	
- Pumping Arrangements	
- Strainer Arrangements	
- Layout of Pipelines	
- Storage and Handling Temperatures	
- Day or Service Tanks	
COAL	
- Storage Yard	
- Spontaneous Combustion	
- Safe Storing of Coal	
3. PREPARATION OF FUELS	20
FUEL OIL	
- Viscosity - Temperature Relationship	
- Preheaters	
COAL	
- Size	
- Fines & Segregation	
4. COMBUSTION & DRAFT	26
COMBUSTION	
- 3 T's of Combustion	
- Chemical Reactions	
- Air for Combustion	
- Products of Combustion	
- Quantities of Air	

GAS ANALYSIS

DRAFT

- *Natural Draft*
- *Mechanical Draft*
- *Draft Measurement and Control*

EXCESS AIR

- *Calculations of Excess Air*

5. FUEL FIRING SYSTEMS

36

OIL FIRING SYSTEMS

- *Pressure Jet Burners*
- *Constant Differential Valve*
- *Rotary Cup Atomisation*
- *Sonic or Ultrasonic Burners*
- *Viscous Friction Burners*
- *Selection of Burners*
- *Burner Operation and Maintenance*
- *Burner Operation*
- *Burner Controls*

COAL

- *Hand Firing*
- *Chain - Grate Stoker*
- *Spreader Stoker*
- *Pulverised Fuel Firing*

6. BOILERS

59

DIFFERENT TYPES OF BOILERS

- *Principles of Natural and Forced Circulation of Boilers*
- *Modes of Heat Transmission*
- *Safety Requirements*
- *Heat Transmission Rates and Modes*

OPERATION OF BOILERS

- *Superheat Temperatures*
- *Blow Down*
- *Stoker Fired Boilers*
- *Excess Air Control*
- *Sampling and Analysis of Flue Gases*
- *Boiler Deposits and Gas Side Corrosion*
- *Deposit Control*
- *Removal of Deposits*
- *Maintaining Quality and Purity of Steam*
- *Care and Maintenance of Boilers*
- *Maintenance of Boiler Setting and Furnace Wall*
- *Preventive Maintenance Schedule*

AUTOMATIC COMBUSTION CONTROL

- *Need for Automatic Control*
- *Automatic Combustion Control*
- *Drum Level or Feed Water Control*

STEAM TEMPERATURE CONTROL

- *Types of Controls*

MEASUREMENT AND TESTING OF BOILERS

- *Thermal Efficiency*
- *Methods for **Calculating** Boiler Efficiency, Test Conditions and Accuracy of Observations*
- *Limitations of Boiler Efficiency Test Results, and Importance of Heat Balances*
- *Variables that Influence Heat Balance*
- *Effect of Design and Operating Factors on Heat Balance*
- *Conclusion and **Recommendations***

FEED WATER TREATMENT

- *Internal Boiler Water **Treatment***
- *External Boiler Water Treatment*

7. FURNACES

118

PRINCIPLES

- ***Air-fuel** Ratio*
- *Furnace Pressure*
- *High Temperature Insulation*
- *Refractories*
- *Waste Heat Recovery*
- *Non-uniform Temperature Distribution*
- *Scale Loss*
- *Furnace **Atmosphere***
- *Furnace Loading*

SOME TYPICAL FURNACE

- *Reheating Furnace*
- *Batch Furnace*
- *Pusher Furnace*
- *Soaking Pits*
- *Heat **Treatment** Furnaces*
- *Cement Kilns*
- *Operation of Wet Process Cement Kilns*
- *Glass Tank Furnaces*
- *Ceramic Kilns*
- *Means of Achieving Fuel Economy in Different Type of Kilns*

8. STEAM DISTRIBUTION & UTILISATION

149

DISTRIBUTION

- *Pipe Expansion*
- *Drain Points*
- *Maintenance of Pipelines*

UTILISATION

- *Preventing Avoidable Losses of Heat*
- *Heat **Transfer** and Heating Surfaces*
- *Air Venting*
- *Steam **Trapping***
- *Steam **Utilisation** in Specific Equipment*

9. WASTE HEAT RECOVERY SYSTEMS

169

ECONOMISERS

- *Plain Tube **Economisers***
- *Finned Tube Economisers*

AIR PREHEATERS

- *Recuperators*
- *Regenerators*

WASTE HEAT BOILERS

RECOVERY OF HEAT FROM LOW TEMPERATURE PROCESSES

HEAT **PIPE**

HEAT PUMPS

ENERGY WHEELS

HEAT RECOVERY FROM MISCELLANEOUS SOURCES

10. THERMAL INSULATION

183

PRINCIPLES

CLASSIFICATION OF INSULATING MATERIALS

PHYSICAL FORMS OF INSULATIONS

PROBLEMS IN LOW TEMPERATURE INSULATION

COMMON INSULATING MATERIALS

- *Plastic Foams*
- *Mineral Fibres*

REFRACTORIES AS INSULATORS AT **HIGH**
TEMPERATURES

- *Insulating Refractories*
- *Insulating Bricks*

SELECTION OF AN **INSULANT**

- *Optimum Economic Thickness*
- *Factors to be Considered in Applying **Thermal**
Insulation*

11. INSTRUMENTATION

205

CLASSIFICATION OF VARIABLES

TEMPERATURE MEASUREMENT

- *Thermocouples*
- *Resistance **Thermometers***
- *Thermistors*
- *Transistors*
- *Expansion or Filled Bulb Systems*
- *Radiation Pyrometers*
- *Optical Pyrometers*
- *Light Sensitive Pyrometers*
- *Temperature Measurement*

PRESSURE MEASUREMENT

- *Bourdon Tube Element*
- *Diaphragm*
- *Bell **Type** Transmitter*
- *Strain Gauges*
- *Piezo Electric **Crystals***
- *Selection and Application*

FLOW MEASUREMENT

- *Differential-Pressure Systems*

- Orifice Plate
- Positive Displacement Meters

GAS ANALYSIS

- Chemical Absorption Method
- Thermal Conductivity Method
- **Thermomagnetism**
- Infra-red Gas Analysis
- Electrochemical Method
- Spectral Emission
- Probe Type Analyser
- Smoke

WEIGHT MEASUREMENT

12.	TOTAL ENERGY	230
	TOTAL ENERGY CONCEPT	
	- Conversion Efficiencies of Heat into Work	
	- Reason for Wide Use of Steam as Working Fluid	
	THE BASIC TOTAL ENERGY SYSTEMS CYCLE	
	- Basic Economics	
	- Choice of Prime Movers	
	- Ratio of Steam and Power in Various Industries	
	- Industries in which TES Schemes are Economical	
	TOTAL ENERGY CONCEPT FOR INDUSTRY	
	- Steam and Electrical Power Simultaneously	
	- Total Energy Heater	
	- Potentialities of Application of Total Energy Concept to industries	
13.	SOME CASE STUDIES	251
	A PHARMACEUTICAL UNIT	
	A TEXTILE PROCESSING UNIT	
	A POTTERY WORKS	
	A FIVE STAR HOTEL	
	A TEXTILE MILL	
	A CHEMICAL UNIT	
	A PLYWOOD FACTORY	
	A RAYON PLANT	
	A PAPER PLANT	
	AN OIL HYDROGENATION PLANT	
	A FORGING COMPANY	
	CAPTIVE POWER GENERATION	
14.	APPENDICES	269
	UNITS AND CONVERSION FACTORS	
	SUGGESTED FOR FURTHER READING	
15.	INDEX	277
