

## CONTENTS

<b>Introduction</b>	<b>1</b>
<b>Sources of biomass-Wastes and Resoures</b>	<b>3</b>
The Resourde	3
Industrial and Urban Waster	8
Animal Manures	18
Crop residues	22
Forestry Residues	28
<b>Sources of biomass-Energy farms</b>	<b>46</b>
General considerations	46
Silviculture	48
Conventional Energy Crops	58
Unconventional Energy Crops	67
Plant Improvement	80
Aquaculture	84
<b>Thermal conversion methods</b>	<b>103</b>
Overview	103
Pyrolysis Processes	110
Steam Reforming	131
<b>Primary biochemical conversions</b>	<b>148</b>
Overview	148
Methane by Anaerobic Fermentation	152
Glucose from cellulose and Starch	164
Biophotolysis	184
<b>Secondary conversion Processes</b>	<b>187</b>
Methanol Production	187
Hydrocarbons	192
Ammonia Production	195
Fermentation of Sugars to Ethanol	196
Fermentation of Sugars to Other Products	214
<b>Case studies and Economics-Pyrol ysis methods</b>	<b>219</b>
Georgia Institute of technology mogile agricultural Pyrolysis system	219
Andco-Torrax pyrolysis system	227
Union carbide purox pyrolysis system syngas production	234
Alternative Uses of Purox-Formed syngas	239
Occidental Flash pyrolysis system	255
Other Pyrolysis Plants	258
Hypothetical conversion to Medium btu gas from Biomass	260

<b>Case studies and economics-methane by anaerobic fermentation</b>	<b>266</b>
Digestion of Crop Residues	266
Digestion of Manure: Beef Cattle Feedlots	273
Digestion of Manure: Dairy Operations	277
Biogas Plants in Developing Naitons	288
Small Scale Farm Digesters	294
Biogas Production in Cities	306
<b>Case studies and economics-Biomass sources</b>	<b>310</b>
Residues	310
Energy farms	318
<b>Market Penetration analysis</b>	<b>331</b>
Overview	331
Mission Ranking	336
<b>Environmental Impacts</b>	<b>344</b>
Introduction	344
Biomass Conversions	363
Environmental Development plan for Fuels from biomass	368
Conclusion	370
<b>Sources utilized</b>	<b>374</b>
