

CONTENTS

Part I Electronic Properties

Theory of the Electron Transport Properties of Single-Crystalline Graphite— W. McClure and L. B. Smith	3
Electronic Processes in Pyrolytic Graphites— C. A. Klein	11
The Magnetic Susceptibility of Pyrolytic Carbons— D. B. Fischbach	27
A Review of Electron Spin Resonance in Carbonaceous Materials— L. S. Singer	37
Electron Spin Resonance in High-temperature Carbons and Graphites— L. S. Singer and G. Wagoner	65
Double Magnetic Resonance in Chars— M. Jacubowicz and J. Uebersfeld	73
Further Studies of Electron Spin Resonance in Chars, Carbons and Graphites— S. Mrozowski	79
Trapped Radicals in Organic Deposits— R. Mangiaracina and S. Mrozowski	89
A Magnetic Study of the Carbonization and Graphitization of Some Representative Polymers— H. E. Blayden and D. T. Westcott	97
Semiconduction in Pyro-Polymers Doped with Na, Ca, and Th— H. A. Pohl and S. L. Rosen	113
Semiconductive Properties of Carbonized Coal— P. L. Waters	131
Spectral Studies of Coal— R. A. Friedel and H. Retcofsky	149
Absorption of Graphite in the Ultraviolet and Visible Spectrum— S. Ergun and J. T. McCartney	167
Infrared Absorption at Two Microns and Coal-tar Pitch Properties— P. L. Walker, Jr. and D. O. Baumbach	175

Part II Surface Properties, Absorption and Reactivity

Direct Titration of the Acidity of Carbon Blacks— M. L. Studebaker	189
Hydride-transfer Reactions of Carbon Black— D. Rivin	199
The Role of the Surface Complex in the Carbon-Oxygen Reaction— N. R. Laine , P. J. Vastola , and P. L. Walker, Jr.	211
The Formation and Oxidation of High-area Carbon Films— V. R. Deitz and E. P. McFarlane	219
Oxidation Kinetics of Pyrolytic Graphite— W. S. Horton	233
Catalysis of the Carbon-Carbon Dioxide Reaction by Iron— J. P. Rakszawski , F. Rusinko, Jr. , and P. L. Walker, Jr.	243

Mode of Porosity Development in Activated Anthracite—M. Kawahata and P. L. Walker, Jr.	251
Steam Activation of Charcoal: A Systematic Study of Weight and Volume Losses—D. G. Edwards, R. York, J. Tracht, P. E. Loveday, and F. P. Williams	266
Chemical Characteristics of Carbon Brush Wear Dust—R. J. Bobka	287

Part III Irradiation Effects, Gas Permeability

Observation of Lattice Defects in Fission Fragment-irradiated Graphite—F. E. Fujita and K. Izui	297
On the Mechanism of Radiation Damage in Graphite—W. Bollmann	303
Effect of Heat Treatment on the High-temperature Thermal Properties of Baked Carbons and Irradiated Graphite—J. F. Doar and J. N. Pike	311
Preliminary Results on Radiation Damage in Various Graphites—M. Beutell, E. Fitzer, R. Gain, and O. Vohler	319
Gas Permeability Studies on Some Artificial Graphites—T. R. Jenkins and F. Roberts	335
The Use of Graphite in High-temperature Nuclear Fuel Elements—W. V. Goeddel, G. R. Tully, Jr., and R. A. Meyer	347
The Role of Pore Structure in the Oxidation of Graphite by Irradiated Carbon Dioxide—J. M. Hutcheon, H. C. Cowen, and J. Winton	379
The Development of Low Permeability Graphite for the Dragon Reactor Experiment—L. W. Graham, W. Watt, and W. Johnson, P. A. P. Arragon and M. S. T. Price	387
Experiments on the Diffusion of Cesium and Barium Through Graphites of Low Helium Permeability—A. B. Riedinger, C. E. Milstead, and L. R. Zumwalt	405

Part IV Carbonization, Graphitization and Structure

Studies of the Thermal Behavior of Some Polynuclear Aromatics—I. C. Lewis and T. Edstrom	413
Influence of Aromatic Nitro-compounds on the Condensation of Coal-tar Pitch—S. Yamada	431
Rate of Graphitization of Carbon—S. Mizushima	439
Studies on the Deposition of Pyrolytic Carbons—K. W. Carley-Macaulay and M. Mackenzie	449
Some Effects of Annealing Pyrolytic Graphite—J. T. Meers	461
The Microscopic Structure of Pyrographite—G. Susich and L. M. Dogliotti	467
Comparison of Properties of Carbon and Graphite Bodies Produced From Anthracite and Petroleum Coke—I. Geller and P. L. Walker, Jr.	471
Particle Shape Factors, Crystallite Orientation, and Grindability of Petroleum Cokes—P. L. Walker, Jr., R. P. Gardner, M. A. Short, and L. G. Austin	483
Development of Three-dimensional Crystallinity in Natural Graphitic Materials—M. Mentser, H. J. O'Donnell, and S. Ergun	493

The Tetrahedral Structure in Evaporated Thin Films of Carbon—J. Kakinoki	499
Some Difficulties Encountered in the Application of X-ray Diffractometer Measurements to the Matrix Method of R. Diamond for the Determination of Crystallite Size Distributions in Turbostatic Carbons—H. A. McKinstry and M. A. Short	507
The Breit-Dirac Correction to Compton Scattering of Carbon—S. Ergun and W. F. Donaldson	517

Part V Mechanical and Thermal Properties. Imperfections

Electron Microscopy of Imperfections in Graphite Crystals—G. K. Williamson and C. Baker	521
Extended Dislocations in the Anisotropic Elastic Continuum Approximation—G. B. Spence	531
Internal Friction of Carbon Materials—T. Tsuzuku and H. Kobayashi	539
Creep and Recovery in Graphites at High Temperatures—E. J. Seldin	546
Compressibility of Carbon Black—A. I. Medalia and R. L. Sawyer	563
Further Studies of Young's Modulus of Carbons at Room Temperature—J. F. Andrew and J. Distanto	585
Preliminary Studies of Young's Modulus of Carbons at High Temperature—J. F. Andrew and D. C. Wobschall	589
The Strength of Commercial Graphite I. B. Mason	597
Preparation of Special Graphite Grades for Jet Propulsion Laboratory High-temperature Studies—L. Simbeck and R. Kronenwetter	611
Structural and High-temperature Tensile Properties of Special Pitch-Coke Graphites—H. E. Martens and W. V. Kotlensky	617
Mechanical Properties of Pyrolytic Graphite to 2800°C—W. V. Kotlensky and H. E. Martens	625
The Spectral Emissivity and Total Normal Emissivity of Commercial Graphites at Elevated Temperatures—A. F. Grenis and A. P. Levitt	639
Thermal Conductivity of Carbon at High Temperature—H. E. Strauss	647
