

CONTENTS

1	Introduction	1
1.1	General introduction	1
1.2	Product types	2
1.3	Legislation	4
1.4	Water sources	4
1.5	Bottling materials	5
1.6	Other requirements	5
1.7	Consumer choice	6
1.8	Storage of bottled water	6
1.9	Bacteria in bottled water	7
1.10	Serving bottled water	8
1.11	Other uses of bottled water	8
1.12	Environmental issues	8
2	Market development of bottled waters	11
2.1	Introduction	11
2.2	The historical background	11
2.3	market segmentation	13
2.4	The European experience	17
2.5	The UK market	23
2.6	A global perspective	30
2.7	Trends for the future	32
	References	32
3	Categories of bottled water	33
3.1	Introduction	33
3.2	The European picture	34
3.3	The United States	53

3.4	Codex Alimentarius and the world view	55
3.5	Conclusions	60
	Bibliography	61
	Regulations	61
4	Hydrogeology of natural mineral waters	74
4.1	Introduction	74
4.2	Understanding underground water-hydrogeology	75
4.3	Groundwater quality	87
4.4	Groundwater sources-their development and management	97
	Further reading	106
5	Water treatments	107
5.1	Introduction	107
5.2	Subtractive processes	108
5.3	Substitution processes	112
5.4	Additive processes	115
5.5	Energy field processes	117
5.6	Conclusion	118
	Further reading	118
6	Methods and materials for bottling water	119
6.1	Nature of water	119
6.2	Maintaining integrity of water	120
6.3	Labelling	133
6.4	Shelf-life, batch coding and traceability	133
6.5	Hygiene practices	134
	Further reading	138
7	Filling equipment	139
7.1	Introduction	139
7.2	Filling systems	140

7.3	Electro-pneumatic valve system	147
7.4	Non-carbonated filling system	150
7.5	Bottle handling	150
7.6	Filter configuration	155
7.7	Flavour dosing	155
7.8	Carbonation	159
7.9	Cleaning-in-place (CIP)	165
	Acknowledgement	170
8	Quality management	171
8.1	Defining quality	171
8.2	Quality management system	171
8.3	Risk assessment	171
8.4	Process control	173
8.5	Quality assurance	176
8.6	Independent/government laboratories	179
8.7	Recognition of source	181
9	Bottled water coolers	183
9.1	Introduction	183
9.2	World markets	183
9.3	Equipment development	188
9.4	Water categories for coolers	199
9.5	The bottling process	199
9.6	Handling, transportation and service	202
9.7	Hygiene	203
9.8	Trade associations	205
	Acknowledgement	206
10	Third-party auditing of water bottling facilities	207
10.1	Introduction	207
10.2	Conduct of audits	207

10.3	Setting criteria for the audit	211
10.4	The audit	213
10.5	Conclusion of audit and follow-up actions	221
11	The microbiology of Natural Mineral Water	223
11.1	Introduction	223
11.2	Groundwater habitat	224
11.3	Fate of the bacterial flora from source to bottle	237
11.4	Microbial community	244
11.5	Inhibitory effect of autochthonous bacteria	252
11.6	Assessing health risk from autochthonous microflora	258
11.7	Conclusion	262
	Acknowledgement	263
	References	263
12	Microbiology of treated bottled water	274
12.1	Introduction	274
12.2	Source water protection and monitoring	274
12.3	Water treatment	275
12.4	Naturally occurring bacterial	277
12.5	Product safety	281
12.6	Summary	286
	References	286
	Index	289
