## **1 Introduction**

P.R. ASHURST

1.1	Overview	1
1.2	Soft drinks	1
1.2.1	Ready-to-drink products	2
1.2.2	Concentrated soft drinks	2
1.2.3	Legislation	2
1.2.4	Product types	3
1.2.4.1	Ready-to-drink products	3
1.2.4.2	Dilutables	5
1.2.5	Development trends	5
1.2.6	Nutrition	6
1.2.7	New product trends	7
1.3	Fruit juices	8
1.3.1	Processing technology	8
1.3.2	Adulteration	10
1.3.3	Other processes	11
1.3.4	Nutrition	12
1.4	Packaging	13
1.5	Summary	13
	References and further reading	13

## **2 Trends in beverage markets** **15**

G. ROETHENBAUGH

2.1	Introduction	15
2.2	Beverage consumption trends	16
2.3	Regions and markets	21
2.4	Soft drinks dynamics	25
2.5	Soft drinks industry issues	29
2.5.1	Obesity	29
2.5.2	Wellness and functionality	30
2.6	Beverage trends – outlook and conclusion	32
	References and further reading	34

<b>3 Fruit and juice processing</b>	<b>35</b>
BARRY TAYLOR	
3.1 Introduction	35
3.2 Fruit types	36
3.2.1 Botanical aspects, classification of fruit types	36
3.2.1.1 The basics of plant reproduction and fruit formation	38
3.2.1.2 Respiration climacteric	39
3.2.2 Harvesting considerations for berry, citrus, pome, stone and exotic fruits	39
3.3 Fruit types for processing	41
3.3.1 Pome fruits	41
3.3.2 Citrus fruits	41
3.3.2.1 Orange	42
3.3.2.2 Lemon ( <i>C. limon</i> )	42
3.3.2.3 Grapefruit ( <i>C. paradisi</i> )	43
3.3.2.4 Lime ( <i>C. aurantifolia</i> )	43
3.4 General comments on fruit juice processing	43
3.4.1 Processing of 'fleshy' fruits	44
3.4.1.1 Pack press	44
3.4.1.2 The horizontal rotary press	44
3.4.1.3 The use of centrifuges in processing	45
3.4.2 The use of enzymes in fruit juice processing	47
3.4.3 Extraction of citrus juices	50
3.4.3.1 The Fruit Machinery Corporation extractor	50
3.5 Juice processing following extraction, 'cleaning' and clarification	51
3.5.1 Juice concentration, by evaporation	52
3.5.2 Freeze-concentration	54
3.5.3 Hyper- and ultrafiltration	54
3.6 Volatile components	55
3.6.1 Spinning cone column	56
3.6.2 Fruit juice volatiles composition	57
3.7 Legislative concerns	58
3.7.1 European fruit juice and nectars directive	58
3.7.2 AIJN guidelines	59
3.7.3 Labelling regulations and authenticity	59
3.8 Quality issues	60
3.8.1 Absolute requirements	61
3.8.1.1 Soluble solids	61
3.8.1.2 Titratable acidity	61
3.8.1.3 Other quality considerations	64
3.9 Conclusions	66
References and further reading	66
<b>4 Carbohydrate and intense sweeteners</b>	<b>68</b>
K. O'DONNELL	
4.1 Overview	68
4.2 Carbohydrate sweeteners	68

## CONTENTS

4.2.1	Sucrose	69
4.2.1.1	Manufacture	69
4.2.2	Glucose syrups/high-fructose glucose syrups	71
4.2.3	Fructose (levulose)	71
4.3	Overview – intense sweeteners	72
4.3.1	Sweetener approval	73
4.3.2	Labelling	74
4.3.3	Main intense sweeteners in use in soft drinks	75
4.3.3.1	Acesulfame K	75
4.3.3.2	Aspartame	76
4.3.3.3	Alitame	78
4.3.3.4	Cyclamate	79
4.3.3.5	Neohesperidin Dihydrochalcone	80
4.3.3.6	Sucralose	80
4.3.3.7	Neotame	81
4.3.3.8	Saccharin	82
4.3.3.9	Stevioside	82
4.4	New sweeteners/bulking agents used in soft drinks	84
4.4.1	Inulin	84
4.4.2	Fructo-oligosaccharides/oligofructose	85
4.4.3	Polydextrose	85
4.4.4	Trehalose	86
4.4.5	Tagatose	86
4.5	The future	87
	References	87

## **5 Other beverage ingredients 90**

BARRY TAYLOR

5.1	Introduction	90
5.2	Factors influencing the development of the industry	90
5.3	The move towards standardisation	93
5.4	The constituents of a soft drink	94
5.5	Water	95
5.5.1	Requirements	95
5.5.2	Quality of fresh water	97
5.5.3	Water hardness	97
5.5.4	Water treatment	97
5.5.5	Water impurities and their effect	98
5.5.5.1	Suspended particles	98
5.5.5.2	Organic matter	98
5.5.5.3	High alkalinity	99
5.5.5.4	Nitrates	99
5.6	Acidulants	99
5.6.1	Citric acid	99
5.6.2	Tartaric acid	100
5.6.3	Phosphoric acid	101
5.6.4	Lactic acid	102
5.6.5	Acetic acid	102

## CONTENTS

5.6.6	Malic acid	102
5.6.7	Fumaric acid	103
5.6.8	Ascorbic acid	103
5.7	Flavourings	104
5.7.1	Flavourings and legislation	105
5.7.2	Flavourings in application	106
5.7.3	Water-miscible flavourings	107
5.7.3.1	Flavouring mixtures	107
5.7.3.2	Flavouring essence	108
5.7.4	Water-dispersible flavourings	108
5.7.4.1	Oil phase	110
5.7.4.2	Water phase	111
5.7.4.3	Brominated vegetable oil emulsions	112
5.8	Colours	113
5.9	Preservatives	116
5.9.1	Micro-organisms and beverages	117
5.9.2	Sulphur dioxide	118
5.9.3	Benzoic acid and benzoates	120
5.9.4	Sorbic acid and sorbates	120
5.10	Other functional ingredients	121
5.10.1	Stabilisers	121
5.10.2	Saponins	121
5.10.3	Antioxidants	122
5.10.4	Calcium disodium EDTA	123
5.11	Investigation of a finished soft drink	123
5.12	Food safety	126
5.13	Future trends	127
	Further reading	128

## **6 Non-carbonated beverages** **129**

**P.R. ASHURST**

6.1	Introduction	129
6.2	Dilutable beverages	129
6.2.1	Overview	129
6.2.2	Nomenclature	130
6.2.3	Ingredients	131
6.2.3.1	Fruit components	131
6.2.3.2	Carbohydrates	134
6.2.3.3	Intense sweeteners	136
6.2.3.4	Other ingredients	138
6.2.4	Manufacturing operations	140
6.2.4.1	Ingredients	141
6.2.4.2	Mixing	141
6.2.4.3	Pasteurisation	142
6.2.4.4	Homogenisation	142
6.2.5	Filling and packaging	143
6.2.6	Product range	143
6.3	Ready-to-drink non-carbonated products	143
6.3.1	Overview	143
6.3.2	Formulations	143

## CONTENTS

6.3.3	Special problems	144
6.3.4	Manufacturing and packing	144
6.3.5	Packaging types	144
6.4	Fruit juices and nectars	145
6.4.1	Processing	146
6.4.1.1	Flash pasteurisation	146
6.4.1.2	In-pack pasteurisation	147
6.4.1.3	Hot filling	147
6.4.1.4	High-pressure pasteurisation	147
6.4.2	Packaging	147
6.4.2.1	Boxes	148
6.4.2.2	Bottles	148
6.4.2.3	Cans	148
6.4.2.4	Bulk packs	149
	Further reading	149
<b>7</b>	<b>Carbonated beverages</b>	<b>150</b>
	D. STEEN	
7.1	Introduction	150
7.2	Carbon dioxide	150
7.3	Carbon dioxide production	152
7.3.1	Fermentation	152
7.3.2	Direct combustion	153
7.3.3	Quality standards	154
7.3.4	Delivery to the customer	155
7.3.5	Precautions	155
7.4	Carbonation	155
7.4.1	Basic considerations	159
7.4.2	Carbonation measurement	161
7.5	Syrup preparation	163
7.6	De-aeration	164
7.7	Carbonators	165
7.8	Filling principles	167
7.8.1	Gravity filler	168
7.8.2	Counter-pressure filler	174
7.8.3	Other filler types	177
7.8.4	Clean-in-place systems	178
7.9	Process control	180
7.10	Future trends	181
	Further reading	181
<b>8</b>	<b>Processing and packaging</b>	<b>182</b>
	R.A.W.LEA	
8.1	Introduction	182
8.2	Juice extraction	182
8.3	Blending	182
8.3.1	Batch blending	183

8.3.2	Flip-flop blending	184
8.3.3	Continuous blending	184
	Processing	184
8.4.1	Flash pasteurisation	185
8.4.2	Hot filling	186
8.4.3	In-pack pasteurisation	187
8.4.4	Aseptic filling	187
8.4.5	Chilled distribution	189
8.4.6	Summary	189
8.5	Control of process plant	189
8.6	Factory layout and operation	190
8.7	Hazard Analysis Critical Control Points	194
8.8	Good manufacturing practice	194
8.9	Cleaning in place	195
8.10	Packaging	196
8.11	Conclusion	198
<b>9</b>	<b>Packaging materials</b>	<b>200</b>
	<b>G.A. GILES</b>	
9.1	Introduction	200
9.2	Commercial and technical considerations	200
	9.2.1 General considerations	200
	9.2.2 Packaging materials	202
9.3	Processing	203
	9.3.1 Cold-filling	204
	9.3.2 In-pack pasteurising	204
	9.3.3 Hot-filling	205
	9.3.4 Aseptic filling	205
9.4	Bottles	208
	9.4.1 Glass	208
	9.4.2 Polyethylene terephthalate	210
	9.4.3 Polyvinyl chloride	212
	9.4.4 High-density polyethylene	212
	9.4.5 Polypropylene	213
	9.4.6 Plastics permeability data	213
9.5	Closures	213
	9.5.1 Metal roll-on or roll-on pilfer-proof closures	213
	9.5.2 Vacuum seal closures	215
	9.5.3 Plastic closures	217
9.6	Cans	218
	9.6.1 Liquid nitrogen injection	222
	9.6.2 Plastic cans	222
9.7	Cartons	223
9.8	Flexible pouches	229
9.9	Secondary packaging	230
9.10	Pack decoration	231
9.11	Environmental considerations	232
9.12	Conclusions	234
	Acknowledgements	235
	Further reading	235

## CONTENTS

### **10 Analysis of soft drinks and fruit juices 236**

D.A. HAMMOND

10.1	Introduction	236
10.2	Sensory evaluation	238
10.3	Water	238
10.4	Sweeteners	240
	10.4.1 Analysis of natural sweeteners	240
	10.4.2 Analysis of high-intensity sweeteners	244
10.5	Preservatives	247
	10.5.1 Benzoic and sorbic acids and para-hydroxybenzoates	248
	10.5.2 Sulphur dioxide	249
10.6	Acidulants	250
10.7	Carbonation	253
10.8	Miscellaneous additives	255
	10.8.1 Caffeine	255
	10.8.2 Quinine	256
	10.8.3 Taurine	256
	10.8.4 Fibre analysis	257
	10.8.5 Herbal drinks	257
	10.8.6 Osmolality	258
10.9	Analysis of colours used in soft drinks	258
	10.9.1 Assessment of colour	259
	10.9.2 Synthetic colours	261
	10.9.3 Natural pigments	263
	10.9.3.1 Anthocyanin pigments	263
	10.9.3.2 Carotenoid-type materials	266
10.10	Vitamin analysis in soft drinks systems	267
	10.10.1 Fat-soluble vitamins	268
	10.10.2 Vitamin B class	269
	10.10.3 Vitamin C	269
10.11	Methods used to detect juice adulteration	270
10.12	Methods used to assess the juice or fruit content of a soft drink	272
10.13	Conclusions	273
	References	274

### **11 Microbiology of soft drinks and fruit juices 279**

P. WAREING and R.R. DAVENPORT

11.1	Introduction	279
11.2	Composition of soft drinks and fruit juices in relation to spoilage	279
11.3	Background microbiology – spoilage	281
	11.3.1 Sources	281
	11.3.2 Yeasts	281
	11.3.3 Bacteria	283
	11.3.4 Moulds	284
	11.3.4.1 Mycotoxins	285
11.4	Microbiological safety problems	286
	11.4.1 Escherichia coli	286
	11.4.2 Salmonella	286

## CONTENTS

12.3.3	Hazing	314
12.3.4	Availability	315
12.4	Extracts and their applications	315
12.4.1	Infusions	315
12.4.2	Soft Extracts	316
12.4.3	Dry Extracts	316
12.4.4	Incorporation of extracts in beverages	316
12.4.4.1	Fruit-juice-based and fruit-flavoured drinks	316
12.4.4.2	Mineral-water-based drinks	317
12.4.4.3	Energy drinks	317
12.4.4.4	Regulatory issues	318
12.5	Some commonly used herbs	319
	References and further reading	335

## **13 Special topics 336**

Q. PALMER

13.1	Complaints and enquiries	336
13.1.1	Complaints	336
13.1.2	Enquiries	338
13.2	Nutrition	339
13.2.1	Nutritional components	340
13.2.1.1	Water	340
13.2.1.2	Carbohydrates	340
13.2.1.3	Protein	341
13.2.1.4	Fat	341
13.2.1.5	Fibre	342
13.2.1.6	Vitamins	342
13.2.1.7	Minerals	342
13.2.1.8	Energy	342
13.2.1.9	Low-calorie drinks	343
13.2.2	Calculation and declaration of nutrition information	343
13.3	Soft drinks and dental damage	346
13.3.1	Causes of dental damage	346
13.3.2	Can soft drinks cause dental damage?	347
13.3.3	Fluorides	348
13.3.4	Making soft drinks more tooth friendly	348
13.4	Ingredient specifications	350
13.4.1	Why have specifications?	350
13.4.2	What a specification should include	350
13.4.3	Preparation of a specification	351
13.4.4	Supplier performance	352
13.5	Sports drinks	352
13.5.1	Definition and purpose	352
13.5.2	Physiological needs	353
13.5.2.1	Energy	353
13.5.2.2	Water	353
13.5.2.3	Electrolytes	354
13.5.2.4	Vitamins	354
13.5.3	The absorption of drinks	354

## CONTENTS

13.5.3.1	Gastric emptying	355
13.5.3.2	Absorption from the intestine	355
13.5.3.3	Consumption pattern	355
13.5.4	Formulation	356
13.5.4.1	Preliminary stage	356
13.5.4.2	Palatability	357
13.5.4.3	Prototype development	358
13.5.4.4	Final formulation	358
13.5.4.5	Powdered sports drinks	358
13.6	Niche drinks	359
13.6.1	Alcoholic type drinks	359
13.6.2	Energy drinks	360
13.6.3	Functional drinks or nutraceuticals	360
13.6.4	Powder drinks	361
13.6.4.1	Manufacture	361
13.7	Dispensed soft drinks and juices	361
13.7.1	Introduction	361
13.7.2	Pre-mix and post-mix compared	362
13.7.3	Equipment	362
13.7.4	Outlets	364
13.7.5	Hygiene	365
13.7.6	Post-mix syrup formulation	365
13.7.7	Post-mix syrup packaging	366
13.7.7.1	Post-mix syrup production	366
13.7.7.2	Product quality at the outlet	367
13.7.7.3	Uncarbonated systems	367
	References	367
	<b>Index</b>	<b>369</b>
