# Contents

<i>Preface</i>	<i>iii</i>
Prediction Models for Thermophysical Properties of Foods <i>Dennis R. Heldman</i>	
2. Introduction to Modeling and Numerical Simulation <i>K. P. Sandeep and Joseph Irudayaraj</i>	25
3. Aseptic Processing of Liquid and Particulate Foods <i>K. P. Sandeep and Virendra M. Puri</i>	37
4. Modeling Moisture Diffusion in Food Grains During Adsorption <i>Kasisviswanathan Muthukumārappan and Sundaram Gunasekaran</i>	83
5. Deep-Fat Frying of Foods <i>Rosana G. Moreira</i>	115

6. **Mathematical Modeling of Microwave Processing of Foods  
An Overview**  
*Ashim K. Datta*
7. **Infrared Heating of Biological Materials**  
*Oladiran O. Fasina and Robert Thomas Tyler*
8. **Modeling Electrical Resistance (“Ohmic”) Heating of Foods**  
*Peter J. Fryer and Laurence J. Davies*
9. **Stochastic Finite-Element Analysis of Thermal Food Processes**  
*Bart M. Nicolai, Nico Scheerlinck, Pieter Verboven, and  
Josse De Baerdemaeker*
10. **Neural Networks Approach to Modeling Food Processing  
Operations**  
*Vinod K. Jindal and Vikrant Chauhan*

*Index*
