

Contents

<i>Preface</i>	<i>iii</i>
<i>Contributors</i>	<i>ix</i>
1. Microbial Control in Foods: Needs and Concerns <i>John N. Sofos</i>	
2. Thermal Inactivation of Microorganisms <i>Vijay K. Juneja</i>	13
3. Microbial Control with Cold Temperatures <i>Colin O. Gill</i>	55
4. Inactivation by Irradiation <i>Aubrey F. Mendonca</i>	75
5. Microwave Inactivation of Pathogens <i>Stephanie Doores</i>	105
6. Control of Microorganisms with Chemicals <i>P. Michael Davidson</i>	165

7	Microbial Control by Packaging <i>Gaurav Tewari</i>	101
8	Control of Foodborne Microorganisms with Carbon Dioxide Under Elevated Pressure <i>Gerhard J. Haas and Paul D. Matthews</i>	235
9	Inhibition of Microbial Growth by Low-Pressure and Ambient Pressure Gases <i>Christopher R. Loss and Joseph H. Hotchkiss</i>	245
10	Control with Naturally Occurring Antimicrobial Systems Including Bacteriolytic Enzymes <i>Grahame W. Gould</i>	281
	Perspectives for Application of Bacteriocins as Food Preservatives <i>Michael L. Chikindas and Thomas J. Montville</i>	303
12	Formulating Low-Acid Foods for Botulinal Safety <i>Kathleen A. Glass and Eric A. Johnson</i>	323
13	Reduction of Microbial Contaminants on Carcasses <i>Alejandro Castillo, Margaret D. Hardin, Gary R. Acuff, and James S. Dickson</i>	351
14	Inactivation by High-Intensity Pulsed Electric Fields <i>Juan Fernández Molina, Gustavo V. Barbosa-Cánovas, Barry G. Swanson, and Stephanie Clark</i>	383
15	Magnetic Fields as a Potential Nonthermal Technology for the Inactivation of Microorganisms <i>Gustavo V. Barbosa-Cánovas, M. Fernanda San Martín, Federico M. Harte, and Barry G. Swanson</i>	399
16	Microbial Inactivation by High Pressure <i>Dallas G. Hoover</i>	419
17	Ohmic Heating <i>Sevugan Palaniappan and Sudhir K. Sastry</i>	451

Contents

vii

18. Modeling Acid Inactivation of Foodborne Microorganisms 461
Robert L. Buchanan, Richard C. Whiting, and Marsha H. Golden
19. Management of Microbial Control in HACCP Systems 479
O. Peter Snyder, Jr., and Vijay K. Juneja
20. Hurdle Technology
Lothar Leistner
21. Summary and Future Prospects
Martin B. Cole and Terry A. Roberts
