| <i>Contributor contact details</i> .....                                      | <i>xi</i> |
| <i>Introduction</i> .....   | <i>xv</i> |
| <b>1 Microbiological testing in food safety and quality management</b> .....  | <b>1</b>  |
| <i>C. de W. Blackburn, Unilever Colworth, UK</i>                              |           |
| 1.1 Introduction .....  | 1         |
| 1.2 Control systems used in the food industry .....                           | 2         |
| 1.3 Role of microbiological testing .....                                     | 9         |
| 1.4 Applying microbiological testing .....                                    | 21        |
| 1.5 Future trends .....   | 24        |
| 1.6 Sources of further information and advice .....                           | 26        |
| 1.7 References .....  | 27        |
| <b>2 Legislation for red meat, poultry and eggs: which way forward?</b> ..... | <b>33</b> |
| <i>M. Fogden, Consultant, UK</i>  |           |
| 2.1 Introduction .....  | 33        |
| 2.2 Codex Alimentarius (food code) .....                                      | 34        |
| 2.3 Regulation in the EU .....  | 40        |
| 2.4 EU regulation on microbiological criteria .....                           | 43        |
| 2.5 Annex I: criteria .....   | 46        |
| 2.6 Future trends .....   | 49        |
| 2.7 Sources of further information and advice .....                           | 51        |
| 2.8 References .....  | 52        |

|  |   |            |
|--|---|------------|
| <b>3</b>   | <b><i>Escherichia coli</i> 0157 and other VTEC in the meat industry .....</b>                                       | <b>55</b>  |
| <b>I. D. Ogden, University of Aberdeen, UK</b>   |   |            |
| 3.1  | Introduction .....  | 55         |
| 3.2  | Pathogenic potential .....  | 58         |
| 3.3  | Key outbreaks of <i>E. coli</i> 0157 and other VTEC .....   | 61         |
| 3.4  | Occurrence in red meat and poultry .....  | 64         |
| 3.5  | Regulatory measures .....   | 66         |
| 3.6  | Laboratory methods of isolation and identification .....  | 67         |
| 3.7  | Industry measures .....   | 68         |
| 3.8  | Consumer responses .....  | 72         |
| 3.9  | Future trends .....   | 73         |
| 3.10   | Sources of further information and advice .....   | 75         |
| 3.11   | References .....  | 76         |
| <b>4</b>   | <b>Faecal indicator organisms for red meat and poultry .....</b>  | <b>83</b>  |
| <b>G. C. Mead, Consultant, UK</b>                |   |            |
| 4.1  | Introduction .....  | 83         |
| 4.2  | Origins and terminology of the indicator concept .....  | 84         |
| 4.3  | Enterobacteriaceae, coliforms and <i>E. coli</i> .....  | 85         |
| 4.4  | Monitoring faecal contamination of meat .....   | 92         |
| 4.5  | Other indicator organisms .....   | 95         |
| 4.6  | Use of <i>E. coli</i> for determining cross-contamination .....   | 95         |
| 4.7  | Sources of further information .....  | 96         |
| 4.8  | References .....  | 97         |
| <b>5</b>   | <b>Spoilage organisms of red meat and poultry .....</b>   | <b>101</b> |
| <b>J. E. L. Corry, University of Bristol, UK</b> |   |            |
| 5.1  | Introduction .....  | 101        |
| 5.2  | Microflora of raw meat immediately after slaughter (red meat and poultry) .....                                     | 102        |
| 5.3  | Factors affecting flora development and changes leading to spoilage .....   | 103        |
| 5.4  | Spoilage of vacuum-packed red meat of normal pH due to psychrophilic or psychrotrophic <i>Clostridium</i> spp. .... | 108        |
| 5.5  | Bone taint .....  | 109        |
| 5.6  | Spoilage of unevacuated poultry .....   | 109        |
| 5.7  | Effect of storage temperature on spoilage .....   | 110        |
| 5.8  | Metabolic products responsible for spoilage .....   | 110        |
| 5.9  | Isolation and identification of spoilage organisms .....  | 112        |
| 5.10   | Future trends .....   | 115        |
| 5.11   | Sources of further information and advice .....   | 115        |
| 5.12   | References .....  | 116        |

|   |     |
|---|-----|
| <b>6 Sampling of red meat .....</b>   | 123 |
| <i>C. O. Gill. Lacombe Research Centre, Canada</i>  |     |
| 6.1 Introduction .....  | 123 |
| 6.2 Purposes of routine microbiological sampling .....                                    | 123 |
| 6.3 Target organisms .....  | 126 |
| 6.4 Sampling plans .....  | 129 |
| 6.5 Sampling sites .....  | 131 |
| 6.6 Methods of sampling .....   | 132 |
| 6.7 Detection methods and enumeration of bacteria .....                                   | 135 |
| 6.8 Interpretation of data .....  | 137 |
| 6.9 Future trends .....   | 141 |
| 6.10 Sources of further information .....   | 142 |
| 6.11 References .....   | 142 |
| <b>7 Sampling methods for poultry-meat products .....</b>                                 | 148 |
| <i>G. C. Mead. Consultant. UK</i>   |     |
| 7.1 Introduction .....  | 148 |
| 7.2 Origins and distribution of carcass contaminants .....                                | 149 |
| 7.3 Microbial attachment to skin and other carcass<br>surfaces .....                      | 151 |
| 7.4 Sampling carcasses in the processing plant .....                                      | 152 |
| 7.5 Methods of sampling carcasses .....   | 153 |
| 7.6 Sampling frozen meat .....  | 157 |
| 7.7 Cut portions and other raw products .....   | 157 |
| 7.8 Cooked, ready-to-eat products .....   | 158 |
| 7.9 Pooling of samples .....  | 158 |
| 7.10 Sample handling and transportation .....   | 159 |
| 7.11 Future trends .....  | 159 |
| 7.12 Sources of further information and advice .....                                      | 160 |
| 7.13 References .....   | 160 |
| <b>8 Microbiological monitoring of cleaning and disinfection<br/>in food plants .....</b> | 165 |
| <i>J. F. Rigarsford, Consultant. UK</i>   |     |
| 8.1 Introduction .....  | 165 |
| 8.2 Sanitisation .....  | 167 |
| 8.3 Sources of product contamination .....  | 168 |
| 8.4 Development of a testing programme .....  | 169 |
| 8.5 Testing plant surfaces .....  | 170 |
| 8.6 Rapid methods .....   | 176 |
| 8.7 Air testing .....   | 180 |
| 8.8 Data utilisation and limit values .....   | 181 |
| 8.9 Future trends .....   | 181 |
| 8.10 Sources of further information .....   | 182 |
| 8.11 References .....   | 182 |
