

CONTENTS

Chapter 1 Introduction: Concepts	1
The Doctrine of “Strict” Liability.....	2
The Doctrine of “Total Accountability”	2
Management and Product Quality.....	2
Organizational Plan.....	3
Total Quality Program	4
The Working Environment.....	4
Workers	4
Managers and Supervisors.....	6
Building Teams of Empowered Employees	8
Employee Training.....	8
Work Teams and Empowerment	8
Quality at the Source.....	9
Steering Committees or QC Circles	9
What Is Quality?	10
Dimensions of Quality	11
Standards of Quality.....	12
Methods for Determining Quality.....	13
Subjective Methods.....	14
Objective Methods.....	14
Adulteration and Contamination.....	14
Differentiation Between Cell Types, Tissue Types, and Microorganisms of Various Stored Foods.....	15
Official Methods of Analysis in the Food Industry	15
The Association of Analytical Communities International (AOAC International).....	15
The American Association of Cereal Chemists	16
The American Oil Chemists’ Society	16
The American Public Health Association.....	16

The American Spice Trade Association	17
The Food Chemicals Codex	17
References	17
Chapter 2 Total Quality Management.....	19
Theories and Application	19
The Concept of Total Quality Management	21
The Basis for Superior Quality Performance	21
TQM and ISO 9000	22
The Structure of TQM	22
The Principles of TQM	23
The 10 Steps to TQM	23
Total Quality Management Tools	23
Statistical Analysis Tools	24
Data Sheet	24
Cause-and-Effect Diagram	24
Scatter Diagram	25
Flowchart	25
Pareto Chart	27
Histogram	28
Control Chart	28
X-Bar and R Charts	30
Attribute Charts	32
p-Charts	32
np-Charts	32
c- or u-Charts	33
Other Types of Charts.....	33
Management and Planning Tools.....	35
Affinity Diagrams	35
Interrelationship Digraphs.....	36
Tree Diagram	37
Matrix Diagram	38
Prioritization Matrices.....	39
Process Decision Program Chart	39
Activity Network Diagram	40
Gantt Chart	40
Entity-Relationship Diagram	41
Key to Quality.....	42
TQM Vision and Mission	43
Integrated Business Plan.....	43
Some History of Total Quality Management.....	44
The Pioneers of Scientific Quality Management.....	46
Frederick Taylor.....	46
Walter A. Shewhart.....	48
W. Edwards Deming	49
Joseph M. Juran.....	52

Armand V. Feigenbaum	54
Philip B. Crosby	56
The Japanese Contribution.....	59
Kaoru Ishikawa	59
Genichi Taguchi.....	62
Quality Circles	66
Present Utilization of TQM Programs.....	68
Quality and Business Performance	69
Service Quality vs. Product Quality	70
The Malcolm Baldrige National Quality Award	71
The Malcolm Baldrige Award Criteria	73
References.....	75
Chapter 3 Quality Assurance.....	79
Theories and Applications.....	79
Functions of a Quality Assurance Program	82
Quality Control	84
Quality Evaluation.....	84
Quality Audits	84
Education and Training.....	86
Process Improvement.....	86
Standards	86
Special Projects.....	86
Consulting	87
Auditing the Quality Program.....	87
Careers in Quality Assurance.....	87
QA Responsibilities and Operational Interactions	90
The Need for and Roles of QA	91
Organization of a QA Program	92
QA Personnel.....	92
The Vice President of QA	93
QA Professionals.....	94
QA Audits	94
Conducting an Audit.....	96
Purposes	96
Procedures.....	96
In-Process Monitoring.....	96
Statistical Procedures	97
The Audit Report	97
Types of Audits	98
Product Manufacturing Audits.....	98
Control of Nonconforming Products	99
Corrective Action.....	99
Plant Sanitation/GMP Audits.....	99
Plant Facilities	100
Employee Hygiene	100

In-Process Control.....	100
Contamination and Adulteration.....	100
Pest Control.....	100
Product Quality Audits.....	101
HACCP Audits.....	102
Special Audits.....	102
Document Control Audits.....	102
Supplier Audits.....	102
QC/Instrument Calibration and Maintenance Audits.....	103
Product Batch Preparation/Formulation Audits.....	103
Quality Program Review.....	103
QA Documentation System.....	103
Quality Manual.....	104
SOP (Manufacturing and Quality) Documents.....	105
PSM Documents.....	105
GMO Documents.....	107
QCA Methods Documents.....	108
SSOP Documents.....	111
GMP Documents.....	112
Equipment-Specific Sanitation Documents.....	114
Pre-Operation Sanitation Documents.....	114
Work Instructions.....	115
Records.....	115
HACCP Program Documents.....	117
References.....	118

Chapter 4 Ingredient Specifications and Supplier Certification

Program.....	119
Raw Material/ingredient Certification Programs.....	120
Degree of Variability.....	121
Flavor Considerations.....	121
The Supplier Quality Program (SQP).....	122
Supplier Qualification.....	123
Approved Vendors List.....	125
Supplier HACCP Qualification Standards.....	128
Supplier HACCP/QA Qualification List by Ingredients Purchased.....	129
Ingredient Specification/Certification.....	131
Supplier Auditing.....	134
Certificate of Analysis.....	135
Third-Party Inspections.....	135
Buying from Agents and Brokers.....	136
Identity-Preserved Products: A New Food Production Scenario.....	136
Defining IP Products.....	136
Consumer Desire.....	138
Processing Improvements.....	138
Product Attributes.....	138

Required Resources 138
 References 139

Chapter 5 Statistical Methods of Quality Control in the Food

Industry..... 141
 Introduction 141
 Statistical Tools and Strategies for Process Control Improvement..... 141
 Design and Analysis of Analytic Studies 142
 Definitions of Terms and Concepts..... 142
 Single Factor Experiments..... 143
 The ANOVA Method 145
 The Randomized Complete Block Design: Two-Way ANOVA 149
 Quality Control Techniques 154
 Variable Control Charts 155
 \bar{X} and R Control Chart 157
 \bar{X} and S Control Chart 162
 How to Use Control Charts 164
 Attribute Control Charts 167
 p-Charts 167
 np-Charts 168
 c-Charts 171
 References 174

Chapter 6 Manufacturing Audits: Control of Processing

Operations 175
 Objectives of Process Control 176
 Elements of Process Control 176
 Education and Training 176
 Process Control Documentation 177
 Unit Operations in the Food Industry 178
 Materials Handling 179
 Cleaning 179
 Separation 180
 Disintegration 180
 Pumping 180
 Mixing 180
 Heating 180
 Cooling 180
 Evaporating 181
 Drying 181
 Packaging 181
 Controlling 181
 Overlapping Unit Operations 181
 Product Manufacturing Audits 182
 Planning the Audit 182

Documentation.....	185
Product-Specific Manufacturing (PSM) Procedures.....	185
General Manufacturing Procedures.....	185
Standard Sanitary Operation Procedures.....	187
Analytical Control Procedures.....	187
Definitions.....	187
Quality Management Areas (Unit Operations).....	187
Product-Dependent Operations.....	189
Product-Independent Operations.....	191
Process Control Points.....	193
Batching.....	194
Manufacturing Procedure Deviations.....	195
Risk Deviations.....	195
Nonrisk Deviations.....	195
Nonrisk Deviations to Risk Requirements.....	195
Audit Deviations: Example.....	196
Deviations from the Manufacturing Program.....	196
Batching and Formulation Practices.....	196
Traditional Chocolate Manufacturing Line.....	196
De Luxe Chocolate Manufacturing Line.....	197
Strawberry Topping Manufacturing Line.....	197
Ingredient Qualification and Storage Program.....	197
Ingredient Analysis Program.....	197
Analytical Test Methods.....	197
Consistency Brabender.....	197
HACCP Analysis.....	198
Batching and Formulation Program.....	198
Granular Sugar — Weighing Scale.....	198
Strawberry Topping Batching.....	198
Maple Walnut Topping.....	199
References.....	199

Chapter 7 Food Plant Sanitation: Good Manufacturing Practice

Audits.....	201
Food Plant Sanitary Practices.....	202
Food Contamination.....	203
Humans.....	204
Equipment.....	204
Air and Water.....	205
Sewage.....	205
Insects, Rodents, and Birds.....	205
The Value of a Planned Sanitation Program.....	206
Storage Facilities.....	206
Litter and Garbage Disposal.....	206
Toxic Substances Control.....	206

Quality Assurance and Sanitation	206
Packaging Technology.....	208
Product Distribution.....	208
Personnel Sanitation and Health Considerations.....	208
Food Plant Sanitation Management	210
Sanitation as an Applied Science	210
The Food Plant Sanitarian.....	211
Personnel Training Programs	212
Plant Facilities Construction and Maintenance	212
Exterior of the Building	212
Grounds/Yard Areas/Landscaping	212
Interior of the Building	213
Doors/Windows/Other Openings.....	213
Air Curtains	214
Plant Walls/Ceilings/Floors	214
Heating, Ventilation, and Air Conditioning (HVAC).....	214
Drainage and Sewage Systems	215
Waste Facilities.....	215
Catwalks/Stairs.....	215
Lights in Processing Areas/Exposed Food Ingredient Areas	215
Mirrors in Processing Areas.....	215
Equipment	216
Metal Surfaces/Support Structures.....	216
Can Conveyors and Can Tunnels	216
Conveyors/Sorting Belts/Shakers/Size Graders/Fillers/Flumes, etc.	216
Flume Make Up Water	217
Mold Buildup.....	217
Belt Sprays.....	217
Equipment above Product	217
Moving Equipment or Parts that Rub Together	217
Motors/Gear Boxes/Pulleys/Other Drive Mechanisms	218
Water Sprays	218
Can/Bottle Lines.....	218
Line Covers	218
Fillers.....	219
Shears and End Plates.....	219
Tanks and Batching Kettles.....	219
Cooking Kettles.....	220
Utensils.....	220
Ingredient Containers	220
Ingredient Bags	220
Plastics and Rubber in Contact with Product or Ingredients.....	220
Exhaust Fans and Vents.....	220
Outside Surfaces of Equipment.....	221
General Construction of Equipment	221

Chemicals.....	221
Lubrication Practices	221
Cleanup Practices	222
Storage of Surplus Equipment/Supplies/Ingredients/Product/etc.....	222
Raw Fruits and Vegetables.....	222
Food Residuals.....	222
Condensate and Heavy Steam.....	222
Pest Control	223
Bait Stations/Rodent Traps.....	223
Insectocutors	223
Employee Practices.....	223
Incoming/Outgoing Material Control.....	224
Raw Material Receiving.....	225
Storage	225
Temperature and Humidity Controls.....	225
Returned Foods.....	225
Outgoing Products.....	225
Process Control: Sanitary Operations.....	225
Employee Hygiene and Sanitary Handling of Food	226
Sanitation and Housekeeping	227
Inner Perimeter Area of Buildings	228
Housekeeping Practices.....	228
Pest Control in Food Processing Plants.....	229
Insects	231
Rodents.....	231
Birds.....	231
Use of Pesticides	232
Finished Products	232
Lab Practices	232
Sanitation Laws and Regulations	232
FDA Regulations	233
USDA Regulations.....	233
EPA Regulations.....	234
The Federal Water Pollution Control Act.....	234
The Clean Air Act	235
FIFRA	235
The Resource Conservation and Recovery Act	235
Hazard Analysis and Critical Control Points Program.....	236
The Sanitation/GMP Audit.....	237
Objectives.....	239
Audit Checklist	240
General Description Sheet.....	240
Definition of GMP Observations.....	240
By Class.....	240
By Program/Control Area and Type of Observation.....	242
By Type	245
The Audit Worksheet (Observations Listing Form).....	250

The Sanitation Audit Report	253
Report Format.....	253
Example of a Plant Sanitation Audit Report.....	254
References.....	262
Chapter 8 Product Quality Audits at the Retail Level.....	265
Definition	265
Objectives.....	266
Procedure.....	266
Planning.....	266
Preliminary Review Meeting.....	266
Protocol	266
Departments Involved.....	267
Product Sampling	267
Product Pick-Up.....	267
Testing.....	271
Packaging Quality	271
Sensory Evaluation.....	278
Analytical Testing	278
Example of a Product Quality Audit.....	279
Objectives.....	279
Protocol	280
Comparison between Eureka and Classic Beef Stew Products	280
Age.....	280
Drained Weight.....	280
Bostwick Value	281
pH	282
°Brix.....	282
Salt	283
Color Agtron	283
Sensory Evaluation.....	284
Eureka Beef Stew	284
Classic Beef Stew	285
Cans: Vacuum and Headspace.....	286
Can Packaging Quality.....	286
Reference	287
Chapter 9 Hazard Analysis and Critical Control Points.....	289
Introduction	289
The HACCP Concept.....	290
The Importance of HACCP.....	295
Advantages	295
The HACCP Program.....	296
Guidelines for Application of the HACCP Principles	296
HACCP Program Prerequisites.....	296
Education and Training.....	298

- Development of an HACCP Program 299
 - The Preliminary Tasks of an HACCP Program 299
 - Choosing the HACCP Team 299
 - Description of the Food Product and Its Distribution 300
 - Description of the Intended Use and Consumers of the Product 300
 - Development of a Flow Diagram Describing a Food Product
 - Manufacturing Process 300
 - Verification of the Flow Diagram 301
 - The Seven HACCP Principles 302
 - Principle 1: Conduct a Hazard Analysis 302
 - Categories of Hazards 304
 - Biological Hazards 305
 - Chemical Hazards 308
 - Physical Hazards 310
 - Preventive Measures 312
 - Questions to Consider when Conducting a Hazard Analysis 314
 - Ingredients 314
 - Intrinsic Factors 314
 - Procedures Used for Processing 318
 - Microbial Content of the Food 318
 - Facility Design 318
 - Equipment Design and Use 318
 - Packaging 319
 - Sanitation 319
 - Employee Health, Hygiene, and Education 319
 - Conditions of Storage between Packaging and the End User 320
 - Intended Use 320
 - Intended Consumer 320
 - Hazard Identification 320
 - The Raw Materials 320
 - The Manufacturing Process 321
 - Control Measures 321
 - Risk Categories 321
 - Documentation 325
 - Special Considerations when Conducting a Hazard Analysis 325
 - Deciding which Potential Hazards Must be Addressed
 - in the HACCP Program 326
 - Principle 2: CCP Identification 328
 - Preventive Critical Control Measures (Microbiological) 330
 - CCP Decision Tree 332
 - Principle 3: Establish Critical Limits for Each CCP 332
 - Principle 4: Establish CCP Monitoring Procedures 339
 - Visual Observations 342
 - Sensory Evaluations 343
 - Physicochemical Evaluations 343
 - Microbiological Analysis 343

Principle 5: Establish Corrective Actions Procedures	344
Identifying Causes of Deviations.....	345
Determining Product Disposition.....	345
Recording the Corrective Action.....	345
Reevaluating The HACCP Plan.....	346
Principle 6: Establish Procedures for HACCP Verification and Validation.....	347
Verification	347
Events that May Require Verification Inspection of the HACCP Plan.....	349
HACCP Verification Protocol and Activities — Information in Verification Reports	349
Verification Schedules.....	350
Validation.....	351
Principle 7: Document the HACCP Program. Establishment of Record-Keeping Procedures.....	352
Format for HACCP Information	360
Examples of Records Required during Operation of the HACCP Program	361
Implementation and Maintenance of an HACCP Program.....	362
Practical Example: HACCP Plan Model for Refrigerated Stick and Sliced Celery	362
The Scope of HACCP.....	384
Regulatory Aspects of HACCP.....	384
Sanitation and the HACCP Concept.....	385
Conclusions.....	385
References.....	386
Glossary of Terms.....	389
Index.....	411
