

CONTENTS

1. Food Biotechnology	1
2. Genetic Engineering Techniques	7
3. Plant Tissue/Cell Culture Techniques	87
4. Microbial Synthesis and Production	105
5. Mutagenesis and Protein Engineering Techniques	119
6. Enzyme Engineering and Immobilization Techniques for Enzymes and Cells	133
7. Biosensor Techniques	171
8. Down-Stream Processing Techniques	189
9. Fermentation Techniques	245
10. Scale-Up Techniques	283
11. Applications	295
