<i>Preface to the Fourth Edition</i>	iii
<i>Preface to the Third Edition</i>	v
<i>Contributors</i>	ix
1. Food Emulsions: Their Structures and Properties	1
<i>Douglas G. Dalgleish</i>	
2. Food Emulsifiers: Their Chemical and Physical Properties	45
<i>Niels J. Krog and Flemming Vang Sparsø</i>	
3. Molecular Organization in Lipids and Emulsions	93
<i>Kåre Larsson</i>	
4. Interactions Between Proteins and Polar Lipids	107
<i>Tommy Nylander</i>	
5. Droplet Flocculation and Coalescence in Dilute Oil-in-Water Emulsions	175
<i>Øystein Sæther, Johan Sjöblom, and Stanislav S. Dukhin</i>	
6. Structure and Stability of Aerated Food Emulsions	221
<i>D. T. Wasan, W. Xu, A. Dutta, and A. Nikolov</i>	
7. Surface Forces and Emulsion Stability	257
<i>Per M. Claesson, Eva Blomberg, and Evgeni Poptoshev</i>	

viii	Contents
8. Coalescence Mechanisms in Protein-Stabilized Emulsions <i>George A. van Aken</i>	299
9. Orthokinetic Stability of Food Emulsions <i>Siva A. Vanapalli and John N. Coupland</i>	327
10. Recent Developments in Double Emulsions for Food Applications <i>Nissim Garti and Axel Benichou</i>	353
11. Structure, Mechanics, and Rheology of Concentrated Emulsions and Fluid Foams <i>H. M. Princen</i>	413
12. Beverage Emulsions <i>Chee-Teck Tan</i>	485
13. Dressings and Sauces <i>Larry D. Ford, Raju P. Borwankar, David Pechak, and Bill Schwimmer</i>	525
14. Analysis of Droplet Characteristics Using Low-Intensity Ultrasound <i>John N. Coupland and D. Julian McClements</i>	573
15. NMR in Studies of Emulsions with Particular Emphasis on Food Emulsions <i>Balin Balinov, Francois Mariette, and Olle Söderman</i>	593
<i>Index</i>	633
