

CONTENTS

Preface	iii
1. INTRODUCTION	1
2. SUMMARIES OF SALIENT FACTS, RECOMMENDATIONS AND LIMITATIONS FOR POST-PROCESS SANITATION	6
3. POST-PROCESS SANITATION PROGRAMMES-OBJECTIVES AND ORGANISATION	27
4. POST-PROCESS SANITATION MEASURES-BACTERIOLOGICAL STANDARDS	38
5. RECOMMENDATIONS FOR THE DESIGN AND LAYOUT OF CAN HANDLING SYSTEMS	42
6. RECOMMENDATIONS FOR CAN COOLING WATER SYSTEMS	58
7. RECOMMENDATIONS FOR THE SANITATION OF POST-PROCESS CAN HANDLING EQUIPMENT	78
A. First Recommendation – Limitation of wet Conveying surfaces	78
B. Second Recommendation – Cleaning of wet Conveying systems	96
C. Third Recommendation – Disinfection of wet Conveying systems during production	127
D. Fourth Recommendation-Extra sanitation Requirements for hydrostatic sterilisers	145
8. RECOMMENDATIONS FOR PERSONAL HYGIENE OF OPERATIVES HANDLING PROCESSED CANS	158
9. APPENDICES	
I. Determination of chlorine residuals in can Cooling water	166
II. Bacteriological examination of can cooling water	170
III. Swab tests – A procedure for bacteriological Assessment of contamination on post-process can handling equipment	174
IV. Impression cultures – A procedure for bacteriological assessment of contamination on hands of operatives	181
V. Suggested list of materials, equipment and protective clothing for cleandown and production hygiene measures	183
VI. Suggested syllabus for training operatives (cleandown and production hygiene measures)	185
