

## CONTENTS

INTRODUCTION	1
I. ORIGINS, GROWTH AND POTENTIAL OF DEHYDRATION	3
II. FACTORY ORGANISATION Plant Location; Raw Material; Labour Requirements; Water; Power; Boilers; Heat Raising Plant; Fuels; Effluent.	11
III. PREPARQTION PLANT Cutters; Peelers; Washers; Blanchers; Conveyors.	29
IV. DRYERS Cabinet Dryers; Tunnel Dryers; Conveyor Band Dryers; Bin Dryers; Belt Trough Dryers; Air Lift Dryers; Rotary Dryers; Vacuum Dryers; Freeze Dryers; Drum Dryers; Spray Dryers; Foam mat Dryers.	48
V. DEHYDRATION OF POTATO PRODUCTS Potato Granules; Potato Flakes; Potato Cubes; Potato Starch.	74
VI. DEHYDRATION OF VEGETABLES Peas; Green Beans; Carrots; Swedes and White Turnips; Beetroot; Celery; Leeks; Onions; Cabbage.	89
VII.DEHYDRATION OF FRUITS Apples; Dehydrated Apples; Prunes; Apricots and Peaches; Tomato Powder.	125
PRACTICAL DEHYDRATION	V
