

## CONTENTS

|   |     |
|---|-----|
| 1. Preface  | 6   |
| 1.1 Preface to the first edition  | 6   |
| 1.2 Preface to the second edition   | 8   |
| List of Members of the Working Party on Frozen Foods                      | 12  |
| <br>  |     |
| 2. Definitions  | 14  |
| 2.1 Frozen foods  | 14  |
| 2.2 Equilibrium temperature (average temperature)                         | 14  |
| 2.3 Thermal centre  | 14  |
| 2.4 Nominal freezing time   | 14  |
| 2.5 Effective freezing time   | 16  |
| 2.6 Freezing rate   | 16  |
| 2.7 Practical storage life  | 16  |
| <br>  |     |
| 3. General principles for the freezing, storage and thawing of foodstuffs | 18  |
| 3.1 Scientific background   | 18  |
| 3.1.1 Introduction to scientific background                               | 18  |
| 3.1.2 Physical aspects of freezing  | 20  |
| 3.1.3 Physico-chemical aspects of freezing                                | 40  |
| 3.1.4 Biochemical aspects of freezing                                     | 42  |
| 3.1.5 Microbiology  | 52  |
| 3.1.6 Temperature measurement   | 56  |
| 3.2 Applications  | 64  |
| 3.2.1 Hygiene in the preparation of frozen products                       | 64  |
| 3.2.2 Packaging of frozen foods   | 68  |
| 3.2.3 Freezing  | 76  |
| 3.2.4 Storage   | 102 |

|                         |                            |     |
|-------------------------|----------------------------|-----|
| 3.2.5 Tolerance (T-TT.) | of frozen foods            | 112 |
| 3.2.6                   | Transport                  | 120 |
| 3.2.7                   | Display and sale by retail | 128 |
| 3.2.8                   | Thawing                    | 136 |
