

## CONTENTS

|   |     |
|---|-----|
| Preface   | vii |
| 1. Some Radiation-Induced Changes in Fresh Fruits and Vegetables  | 1   |
| 2. Irradiation Flavor and the Volatile Components of Beef   | 12  |
| 3. Volatile Compounds Induced by Irradiation in Basic Food Substances   | 26  |
| 4. Effect of Irradiation Temperature and Processing Conditions on<br>Organoleptic Properties of Beef and Chemical Yields in Model Systems | 35  |
| 5. Radiation Chemistry of Polyamino Acids in Aqueous Solutions  | 58  |
| 6. Radiation Dosimetry in Relation to High Intensity Radiation Sources  | 78  |
| 7. Radioactivity Criteria for Radiation Processing of foods   | 87  |
| 8. Elements of Gamma Irradiator Design  | 109 |
| 9. Establishing a Food Irradiation Facility and Related Economic Concepts   | 118 |
