WORK OF THE PANEL

REPORT OF THE PANEL

- I. Research and development on the application of ionizing energy in the developing Countries 2
- II. Education 2
- III. Programme of activity for specific problem areas
 - A. Radiation preservation of fish and marine products
 - B. Disinfestation of dried and smoked fish
 - C. Radiation preservation and disinfestation of fruits and vegetables and their Products
 - D. Virus inactivation

PAPERS PRESENTED BEFORE THE PANEL

Food preservation problems in developing countries	9
The United States Atomic Energy Commission programme on marine products irradiation	19
A discussion of the radiation preservation of fish in developing countries	39
Research in the USSR on the conservation of fish and fish products by gamma irradiation	65
Insect infection of African dried or smoked fish and the possibility of its control by irradiation	73
Disinsectization of African dried and smoked fish by means of irradiation	85
<u>Clostridium botulinum</u> , type E, in relation to irradiation treatment of fresh fish, with special reference to tropical conditions	95
Prospects and needs for radiation disinfestation of packed fruits and vegetables	105
Radiation preservation of some fruits and vegetables	115
Use of ionizing radiations to prolong the storage life of fruit and berries (Review of work in The USSR)	123
Irradiation studies of fruit and vegetables in Latin America	143
Data on radiosensitization of fruit-spoilage fungi by chemical sensitizers	147
Radiosensitivity of purified and crude pectic enzyme preparations	151
Radiation inactivation of foot and mouth disease virus	159
Report of the meeting of the FAO/WHO/IAEA expert committee on the technical basis for Legislation on the wholesomeness and microbiological safety of irradiated food	173
Problems of the pasteurization of fruit juices by irradiation	177
List of Participants	181
