

# REPORT OF THE WORKING PARTY ON IRRADIATION OF FOOD

## CONTENTS

	<i>Page</i>
<b>INTRODUCTION</b> .. .. .	1
Appointment and Terms of Reference .. .. .	1
Membership .. .. .	1
Meetings .. .. .	2
Form of the Report .. .. .	2
Legislative background and possible forms of control .. .. .	2
<b>FUNDAMENTAL CONSIDERATIONS</b> .. .. .	3
Radiation	
Definition of radiation .. .. .	3
Sources of <b>ionising</b> radiation .. .. .	4
Characterisation of radiation .. .. .	4
Measurement of irradiation .. .. .	5
Mode of interaction with matter .. .. .	5
<b>THE DEVELOPMENT OF THE USE OF IONISING RADIATION FOR THE TREATMENT OF FOOD</b> .. .. .	7
<b>THE APPLICATION OF RADIATION TO THE TREATMENT OF FOOD</b> .. .. .	9
<b>THE CHANGES IN FOOD BROUGHT ABOUT BY TREATMENT WITH RADIATION</b> .. .. .	10
Irradiation induced chemical changes in food .. .. .	11
(a) Influence on protein .. .. .	11
(b) Influence on carbohydrates .. .. .	12
(c) Influence on fat .. .. .	12
(d) Influence on vitamins .. .. .	13
(e) The possible presence of mutagens in irradiated food .. .. .	13
The nutritive value of irradiated food .. .. .	14
The examination of irradiated food for the possible presence of toxic substances .. .. .	14
The examination of the wholesomeness of irradiated food .. .. .	15
The examination of irradiated food for the possible presence of carcinogens .. .. .	16
Examination for the presence of induced radioactivity in food .. .. .	18
(a) The possibility that irradiation can <b>induce</b> radioactivity in food by stimulating the ejection of a nuclear particle .. .. .	19
(b) Induced radioactivity resulting from isomer activation .. .. .	20
(c) Assessment of the total induced radioactivity to be expected in food under different conditions .. .. .	20
The possible influence of radiation on permitted food additives .. .. .	22

# CONTENTS (*Continued*)

	<i>Page</i>
THE MICROBIOLOGY OF IRRADIATED FOOD .. .. .	22
The influence of ionising radiation on <b>micro-organisms</b> .. .. .	22
Definition of sterilisation .. .. .	25
Definition of pasteurisation .. .. .	25
Combined treatments for the control of micro-organisms .. .. .	26
Effects on bacteria of pasteurising doses of irradiation .. .. .	26
<i>Clostridium botulinum</i> .. .. .	28
<i>Clostridium welchii</i> .. .. .	29
Ultrafiltrable viruses .. .. .	29
The hazard viewed in perspective .. .. .	29
<b>DISCUSSION</b> .. .. .	30
Possible hazards from the consumption of irradiated food .. .. .	31
Destruction of nutrients .. .. .	31
The possible presence of toxic substances in irradiated food .. .. .	31
The possible presence of chemical mutagens in irradiated food .. .. .	32
The possible presence of induced radioactivity in irradiated food .. .. .	32
Possible microbiological hazards from the consumption of irradiated food .. .. .	32
The principles on which the control of the irradiation of food should be based .. .. .	33
Detection in food of previous treatment by radiation .. .. .	35
<b>CONCLUSION</b> .. .. .	35
<b>RECOMMENDATIONS</b> .. .. .	35
<i>Acknowledgements</i> .. .. .	36
<i>Glossary</i> .. .. .	38
 <i>Appendices:</i>	
I The production and properties of gamma-radiation and of high speed electrons and their use in the treatment of food. By F. G. Young .. .. .	45
II Radioactivity induced in food by treatment with <b>gamma</b> -radiation from cobalt-60 or with X-rays in fast electrons .. .. .	50
III The effects of irradiation on the nutritive value of foods. By the Ministry of Agriculture, Fisheries and Food .. .. .	53
IV Relevant aspects of microbiology .. .. .	63
 <i>List of references</i> .. .. .	 69
