

CONTENTS

	Page
Paper 1. A Place for Intermediate Moisture Foods	1
Paper 2. Technology and Application of New Intermediate Moisture Foods	4
Discussion	28
Session I	
Paper 3. Some Introductory Thoughts on Intermediate Moisture Foods	32
Discussion	40
Paper 4. Intermediate Moisture Petfoods	43
Discussion	52
Paper 5. Water Activity Concepts in Intermediate Moisture Foods	54
Discussion	63
Paper 6. The Significance of Water, Hydration and Aqueous Systems in Intermediate Moisture Foods	66
Discussion	73
Paper 7. Measurement of Water Activity. Critical Appraisal of Methods	75
Discussion	87
Session II	
Paper 8. The Aqueous Environment for Chemical Change in Intermediate Moisture Foods	89
Paper 9. Chemical and Non-Enzymic Changes in Intermediate Moisture Foods	100
Discussion	118
Paper 10. The Stability of Intermediate Moisture Foods with Respect to Micro-Organisms	120
Discussion	134
Paper 11. The Microbial Stability of Intermediate Moisture Foods with Respect to Yeasts	138
Discussion	164
Paper 12. The Stability of Intermediate Moisture Foods with Respect to Mould Growth	166
Discussion	180
Session III	
Paper 13. The Safety of Intermediate Moisture Foods with Respect to Staphylococcus aureus	182
Discussion	201
Paper 14. Control of Clostridia by Water Activity and Related Factors	203
Discussion	211
Paper 15. The Safety of Intermediate Moisture Foods with Respect to Salmonella	215
Discussion	236
Paper 16. Do Mycotoxins Present a Potential Hazard for Intermediate Moisture Foods?	239
Discussion	247

Session IV

Paper 17. Microbiological Specifications for Intermediate Moisture Foods with Special Reference to Methodology used for the Assessment of Compliance	248
Discussion	258
Paper 18. New Developments in Intermediate Moisture Foods: Humectants	260
Discussion	278
Paper 19. Interactions of Micro-organisms with the Environment of Intermediate Moisture Foods	281
Discussion	296
Index	299
