<i>Contributor contact details</i> .....	iii
<i>Preface</i> .....	vii
<b>1 Preservation of food by pulsed electric fields: An introduction</b> .....	<b>1</b>
<i>S. Notermans, Foundation Food Micro and Innovation, The Netherlands</i>	
1.1 The need to preserve food .....	1
1.2 Major preservation technologies .....	3
1.3 Current developments and demands .....	5
1.4 Current needs .....	5
1.5 References .....	7
<b>2 History of pulsed electric field treatment</b> .....	<b>9</b>
<i>S. Toepfl, V. Heinz, Deutsches Institut für Lebensmitteltechnik (DIL) e.V., Germany, and D. Knorr, Berlin University of Technology, Germany</i>	
2.1 Introduction .....	9
2.2 The evolution of PEF techniques .....	10
2.3 Research work on PEF applications from 1980s to 2004 .....	19
2.4 Applications of PEF in food and bio-processing .....	24
2.5 Present situation and future industrial exploitation .....	28
2.6 Outlook and conclusions .....	30
2.7 References .....	31
<b>Part I Technology</b>	
<b>3 Circuitry and pulse shapes in pulsed electric field treatment of food</b> .....	<b>43</b>
<i>S. W. H. de Haan, Delft University of Technology, The Netherlands</i>	
3.1 Introduction .....	43
3.2 Requirements .....	44

3.3	Pulse shapes and associated phenomena	47
3.4	Circuitry	48
3.5	Switches	57
3.6	Other components	60
3.7	Examples of applied systems	61
3.8	Miscellaneous	63
3.9	Trends in pulsed power technology	66
3.10	Sources of further information	67
3.11	References	67
<b>4</b>	<b>Chamber design and process conditions for pulsed electric field treatment of food</b>	<b>70</b>
	<i>H. F. M. van den Bosch (formerly Delft University of Technology), The Netherlands</i>	
4.1	Introduction	70
4.2	Chamber geometries	70
4.3	Electric field calculations	75
4.4	Residence time distribution	78
4.5	Wall temperature	79
4.6	Experimental set-up	84
4.7	Temperature measurements	85
4.8	Other experimental results	89
4.9	Conclusions and future trends	91
4.10	References	92
<b>5</b>	<b>Electrochemistry in pulsed electric field treatment chambers</b>	<b>94</b>
	<i>B. Roddenburg, Delft University of Technology, The Netherlands</i>	
5.1	Introduction	94
5.2	Theory	95
5.3	Experiments	100
5.4	Treatment chamber lifetime	105
5.5	Legislation	105
5.6	Conclusions	106
5.7	References	106
<b>6</b>	<b>Hygienic design for pulsed electric field installations</b>	<b>108</b>
	<i>C. Smit and W. de Haan, Stork Food &amp; Dairy Systems, The Netherlands</i>	
6.1	Introduction	108
6.2	Hygienic demands	109
6.3	Construction elements	109
6.4	Process aspects	110
6.5	Conclusions	117
6.6	References	117

<b>7</b>	<b>Technical and occupational safety requirements when creating foods by pulsed electric fields</b> .....	<b>118</b>
	<i>P. H. E. Morshuis, Delft University of Technology, The Netherlands</i>	
7.1	Introduction .....	118
7.2	Potential safety hazards .....	118
7.3	Technical safety requirements .....	120
7.4	Occupational safety requirements .....	121
7.5	Food safety .....	122
7.6	Conclusions .....	123
7.7	References .....	123
<b>Part II Product safety and quality</b>		
<b>8</b>	<b>Microbial inactivation kinetics of pulsed electric field treatment</b> .....	<b>127</b>
	<i>M. B. Fox, NIZO Food Research, The Netherlands</i>	
8.1	Introduction .....	127
8.2	Factors affecting inactivation kinetics .....	127
8.3	Kinetic models .....	130
8.4	Discussion .....	133
8.5	Sources of further information .....	133
8.6	References .....	134
<b>9</b>	<b>Probable mechanisms of microorganism inactivation by pulsed electric fields</b> .....	<b>138</b>
	<i>G. Sautis, Vėtautas Magnus University, Lithuania, and P. C. Winters, Unilever Research &amp; Development Vlaardingen, The Netherlands</i>	
9.1	Introduction .....	138
9.2	Models used for the description of inactivation kinetics .....	139
9.3	Mechanisms of microorganism inactivation by PEF .....	140
9.4	Discussion .....	148
9.5	Future trends .....	150
9.6	Sources of further information .....	150
9.7	Acknowledgements .....	151
9.8	References .....	151
<b>10</b>	<b>Adaptation potential of microorganisms treated by pulsed electric fields</b> .....	<b>156</b>
	<i>D. Rodrigo, M. Zúñiga, A. Rivas and A. Martínez, Instituto de Agroquímica y Tecnología de Alimentos, Spain, and S. Notermans, Foundation Food Micro and Innovation, The Netherlands</i>	
10.1	Introduction .....	156
10.2	Pulsed electric field technology .....	157

10.3	Sub-lethal damage from PEF .....	157
10.4	Possibility of transformation .....	159
10.5	Assessment of the risk of transforming <i>Lact. casei</i> by PEF treatment .....	160
10.6	Results and discussion .....	161
10.7	Conclusions .....	163
10.8	References .....	163
<b>11</b>	<b>Hurdle technology and the preservation of food by pulsed electric fields .....</b>	<b>165</b>
	<i>L. Álvarez, University of Zaragoza, Spain, and V. Heinz, Deutsches Institut für Lebensmitteltechnik (DIL) e.V., Germany</i>	
11.1	Introduction .....	165
11.2	Combination of PEF and temperature .....	167
11.3	Combination of PEF and pH .....	169
11.4	Combination of PEF and antimicrobials .....	170
11.5	Combination of PEF and high pressure .....	172
11.6	Combination of PEF and ultrasound .....	173
11.7	Future trends .....	174
11.8	Sources of further information .....	174
11.9	References .....	175
<b>12</b>	<b>Validating the safety of foods treated by pulsed electric fields .....</b>	<b>178</b>
	<i>L. Keener, International Product Safety Consultants, Inc., USA</i>	
12.1	Introduction .....	178
12.2	Regulatory considerations .....	179
12.3	General principles of process validation .....	182
12.4	Validating PEF-treated products .....	185
12.5	Validating the process performance .....	190
12.6	Future trends .....	195
12.7	Conclusions .....	196
12.8	Summary .....	198
12.9	References .....	198
12.10	Bibliography .....	200
<b>13</b>	<b>Toxicological aspects of preservation of food by pulsed electric fields .....</b>	<b>201</b>
	<i>A. M. Mutseers, H. J. Schuten, H. C. Mastwijk, Food Technology Centre Wageningen UR, The Netherlands, and A. Zoonen, RIKILT—Institute of Food Safety, The Netherlands</i>	
13.1	Introduction .....	201
13.2	Sources of possible toxicological hazards .....	202
13.3	Metal release by electrode degradation .....	203
13.4	Electrochemistry .....	204
13.5	Possible changes in PEF-treated products: Substantial equivalence study .....	205

13.6	Conclusions and future trends .....	209
13.7	Acknowledgement .....	210
13.8	References .....	210
<b>14</b>	<b>Impact of pulsed electric fields on food enzymes and shelf-life .....</b>	<b>212</b>
	<i>P. Elez-Martínez, O. Martín-Belloso, Universitat de Lleida, Spain and D. Rodrigo, F. Sauphina, Instituto de Agroquímica y Tecnología de Alimentos, Spain</i>	
14.1	Introduction .....	212
14.2	Enzyme inactivation by PEF .....	212
14.3	Shelf-life of food processed by PEF .....	227
14.4	Future trends .....	241
14.5	Nomenclature .....	242
14.6	References .....	242
<b>Part III Applications</b>		
<b>15</b>	<b>Public acceptance of pulsed electric field processing .....</b>	<b>249</b>
	<i>I. Frever and A. Fischer, Social Sciences Group Wageningen UR, The Netherlands</i>	
15.1	Introduction .....	249
15.2	A historical perspective on risk communication .....	250
15.3	The psychology of risk .....	252
15.4	The introduction of GM foods in Europe .....	253
15.5	Consumer perceptions of risk management .....	253
15.6	Other issues of relevance to the introduction of PEF technology .....	254
15.7	References .....	254
<b>16</b>	<b>Economic aspects of pulsed electric field treatment of food .....</b>	<b>257</b>
	<i>H. Hoogland, Unilever Research &amp; Development Vlaarlingen, The Netherlands, and W. de Haan, Sterck Food &amp; Dairy Systems, The Netherlands</i>	
16.1	Introduction .....	257
16.2	PEF for pasteurisation .....	258
16.3	PEF as a processing aid .....	262
16.4	Quality .....	263
16.5	Conclusions .....	264
16.6	Acknowledgements .....	264
16.7	References .....	265
<b>17</b>	<b>Applications of pulsed electric fields for food preservation .....</b>	<b>266</b>
	<i>B. Atanikar, S. R. Gurrum and G. V. Barbosa-Cánovas, Washington State University, USA</i>	
17.1	Introduction .....	266
17.2	Historical overview .....	267

17.3	Preservation of foods with pulsed electric fields.....	270
17.4	The hurdle concept and combination studies.....	286
17.5	Conclusions.....	287
17.6	References.....	288
<b>18</b>	<b>Pitfalls of pulsed electric field processing.....</b>	<b>294</b>
	<i>H. L. M. Lelieveld (formerly Unilever Research &amp; Development Vlaardingen), The Netherlands, H. C. Mastwijk, Food Technology Centre Wageningen UR, The Netherlands, and H. F. M. van den Bosch (former Delft University of Technology), The Netherlands</i>	
18.1	Introduction.....	294
18.2	Control and hygiene.....	294
18.3	Position of treatment chamber.....	295
18.4	Particulate foods and emulsions.....	298
18.5	Gas bubbles.....	299
18.6	Measuring field strength and pulse shape.....	299
18.7	Conclusions.....	299
<b>19</b>	<b>Technologies related to pulsed electric field processing and their potential.....</b>	<b>300</b>
	<i>H. L. M. Lelieveld (formerly Unilever Research &amp; Development Vlaardingen), The Netherlands, and S. W. H. de Haan, Delft University of Technology, The Netherlands</i>	
19.1	Introduction.....	300
19.2	Pulsed magnetic field treatment.....	300
19.3	High-voltage arc discharges.....	301
19.4	Submerged streamers.....	302
19.5	Ohmic heating.....	303
19.6	Microwave and radio frequency heating.....	303
19.7	Electron beam treatment.....	304
19.8	Pulsed intense light.....	304
19.9	Cold gaseous plasma treatment.....	305
19.10	PEF in-pack.....	305
19.11	References.....	306
<b>20</b>	<b>Future potential of pulsed electric field treatment: Treatment of bacterial spores, emulsions and packed products.....</b>	<b>307</b>
	<i>H. C. Mastwijk and P. V. Bartels, Food Technology Centre Wageningen UR, The Netherlands</i>	
20.1	Introduction.....	307
20.2	Current PEF technology.....	307
20.3	Opportunities.....	316
20.4	Conclusion.....	318
20.5	Symbols.....	318
20.6	References.....	319

<b>21</b>	<b>Definitions and guidelines for reporting on pulsed electric field experiments</b> .....	<b>320</b>
	<i>H. C. Mastwijk, K. Guljo-van Beuskom, J. E. Pol-Hofstad, H. S. Jansen, M. Fossman and P. V. Bartels Food Technology Centre Wageningen UR, The Netherlands</i>	
21.1	Introduction.....	320
21.2	Parameters, units and dimensions.....	321
21.3	Electric conductivity and resistance.....	323
21.4	Electric field strength, temperature and treatment time..	326
21.5	Energy balance.....	335
21.6	Processing pre-sterilisation start-up.....	340
21.7	Microbiological inactivation, ring-test assessment.....	342
21.8	Conclusions.....	343
21.9	References.....	345
<b>22</b>	<b>Scaling-up of equipment for pulsed electric field treatment of foods</b> .....	<b>346</b>
	<i>H. F. M. van den Bosch (formerly Delft University of Technology), The Netherlands</i>	
22.1	Introduction.....	346
22.2	Continuous versus batch treatment.....	346
22.3	Parallel versus normal field chamber.....	347
22.4	Flow cross-section of parallel and normal field chamber	349
22.5	Plate-plate chamber versus co-axial chamber.....	350
22.6	Effect of scale on wall temperature.....	350
22.7	Conclusions.....	351
22.8	Acknowledgement.....	351
<b>23</b>	<b>Regulatory acceptance</b> .....	<b>352</b>
	<i>M. Smith (formerly Unilever Research &amp; Development Vlaardingen, The Netherlands), Philip Morris International Research &amp; Development, Neuchâtel, Switzerland</i>	
23.1	Introduction.....	352
23.2	Current European legislation.....	353
23.3	US regulatory position.....	354
23.4	Conclusions.....	356
23.5	References.....	356
