| | Page No. |
|--|----------|
| 1. PRINCIPLES OF PASTEURISATION | 1 |
| Design of safe food pasteurisation treatments | 3 |
| Heat resistance data | 6 |
| Substrate protection effects | 17 |
| Worked examples of pasteurisation values | 19 |
| P values | 23 |
| Legislation considerations | 27 |
| 2. MANUFACTURING OPERATIONS | 35 |
| pH recommendations | 35 |
| Hurdle technology | 39 |
| Water activity | 39 |
| Curing | 39 |
| Multi-component formats | 40 |
| Mixed particulates | 41 |
| Hot filling | 41 |
| Cooling after pasteurisation for ambient stored products | 44 |
| Pasteurised products stored chilled | 44 |
| Cooling of larger pasteurised products designed to be stored chilled | 46 |
| 3. FOOD PRODUCTS - EXAMPLES OF TYPICAL HEAT TREATMENTS | 48 |
| 4. VALIDATION OF PASTEURISATION PROCESSES | 49 |
| 5. CONCLUDING COMMENTS | 53 |
| 6. ACKNOWLEDGEMENTS | 54 |
| 7. REFERENCES AND RELEVANT PUBLICATIONS | 55 |
| 8. GLOSSARY | 69 |
