

CONTENTS

PREFACE	vii
1. Waste Management	1
SECTION I MONITORING	
2. Initial Waste Survey: Putting a Plan into Action	16
3. Flow Measurements	28
4. Sampling Methods	62
5. Waste Characterization	82
SECTION II IN-PROCESS MODIFICATIONS	
6. In-Plant Modifications	107
7. Dry Caustic Peeling Technology, W.G. Schultz and J.H. Green	125
8. Waste Reduction and Energy Use in Blanching, J.L. Bomben	151
9. Whey Treatment and Utilization, R.R. Zall	175
10. Fishery Waste Management, J.H. Green and J.F. Mattick	202
11. Efficient Pollutionless Cyclic Process Systems, R.A. Gallop and <i>A.W. Hydamaka</i>	228
12. Advanced Food Processing Systems, R.A. Gallop and <i>A.W. Hydamaka</i>	254
SECTION III TREATMENT	
13. Treatment Systems	281
14. Pre- and Primary Treatment	299
15. Biological Oxidations	323
16. Logoon Technology	372
17. Advanced Wastewater Treatment	392
18. Coagulation and Flocculation	408

19. Natural Coagulants and The Poultry Industry	424
20. Production of Single-Cell Protein from Food Processing Wastes, <i>Y.D. hang</i>	442
21. Wastewater Treatment in the Meat packing, Poultry Processing And Rendering Industries, <i>J. Mc Vaugh</i>	456
22. Land Treatment	472

SECTION IV REGULATIONS

23. Federal Water Pollution Control Programs Affecting the Food Processing Industry, <i>J.L. cooper and J.D. Denit</i>	499
24. NPDES Compliance Monitoring, D.M. Olson and <i>D.N. Lyons</i>	517

SECTION V ECONOMICS

25. Economic Effects of Treating Fruit and Vegetable Processing Liquid Waste, <i>N.A. Olson, A.M. Katsuyama and W.W. Rose</i>	527
26. Unique Federal Pollution Control Financial Programs, <i>C. Marshall</i>	544

APPENDICES

A English-Metric Conversion Tables for Volumes, Flow Rates and Related Measurements	571
B EPA-Approved Methods for the Analysis of Pollutants (<i>Federal Register</i> , December 1, 1976)	577
C EPA Reports on Pollution Control Studies in the Food Processing Industry	593
D Glossary	603
INDEX	621
