

CONTENTS

Section 1	Theoretical background Manufacture of fresh water	
	Recent developments in crystallization of ice as applied to freeze concentration	15
	Impurity effects on the basal plane solidification kinetice of supercooled water	49
	Some aspects of the hydrate process for sea water desalination	57
	Dendritic freezing of ice from aqueous solutions	69
	Wash columns for the continuous removal of ice crystals from aqueous solutions	85
	The vacuum freezing process for saline water conversion	99
Section 2	Concentration of fruit juices and wines	
	Fundamentals in fruit juice concentration	113
	Concentration of gelatine solutions by freezing	131
	Experiences with the continuous concentration of fruit juices by freezing	141
	Les vins et la cryoconcentration	149
	Les tendances de la recherche tchecoslovaque dans la solution du probleme de la cryo- Concentration des jus de fruits	157
	Installation experimentale de cryo-concentration continue des jus de fruits de Tchecoslo- Vaquie	169
	Freeze concentration of fruit juices	183
	Discussion generale-General discussion	191
