

# Contents

<i>Preface</i>	v
<i>Contributors</i>	<i>xi</i>
1. Present Status and the Future of PEF Technology <i>G.V. Barbosa-Cánovas and David Sepúlveda</i>	1
2. Microbial Inactivation by Pulsed Electric Fields <i>Rafael Pagán, Santiago Condón, and Javier Raso</i>	45
3. Inactivation Kinetics of Microorganisms by Pulsed Electric Fields <i>M. Rodrigo, A. Martínez, and D. Rodrigo</i>	69
4. Does High-Intensity Pulsed Electric Fields Induce Changes in Enzymatic Activity, Protein Conformation, and Vitamin and Flavor Stability? <i>Olga Martín-Belloso, Silvia Bendicho, Pedro Elez-Martínez, and Gustavo V. Barbosa-Cánovas</i>	87
5. Pulsed Electric Field-Assisted Extraction of Juice from Food Plants <i>Eugene Vorobiev, Abdel Baset Jemai, Hazem Bouzrara, Nikolai Lebovka, and Maksym Bazhal</i>	105
6. Application of PEF on Orange Juice Products <i>D. Rodrigo, F. Sampedro, A. Martínez, M. Rodrigo, and G.V. Barbosa-Cánovas</i>	131
7. PEF—A Food Industry's View <i>Huub Lelieveld</i>	145

8.	Fundamentals and Applications of High Pressure Processing to Foods	157
	<i>J. Weltri-Chanes, A. López-Malo, E. Palou, D. Bermúdez, J.A. Guerrero-Beltrán, and G.V. Barbosa-Cánovas</i>	
9.	Thermodynamic Aspects of High Hydrostatic Pressure Food Processing	183
	<i>Gustavo V. Barbosa-Cánovas and José J. Rodríguez</i>	
10.	High-Pressure-Assisted Heating as a Method for Sterilizing Foods	207
	<i>Volker Heinz and Dietrich Knorr</i>	
11.	Freezing and Thawing of Foods Under Pressure	233
	<i>P.D. Sanz</i>	
12.	Starch and Other Polysaccharides Under High Pressure	261
	<i>Fernando Fernández-Martín, Gipsy Tabilo-Munizaga, and Gustavo V. Barbosa-Cánovas</i>	
13.	Advances in Use of High Pressure to Processing and Preservation of Plant Foods	283
	<i>M. Pilar Cano and Begoña de Ancos</i>	
14.	High-Pressure Applications on Myosystems	311
	<i>Pilar Montero and M. Carmen Gómez-Guillén</i>	
15.	High-Pressure Processing of Milk and Dairy and Egg Products	343
	<i>B. Guamis, R. Pla, A.J. Trujillo, M. Capellas, R. Gervilla, J. Saldo, and J. Yuste</i>	
16.	Commercial High-Pressure Equipment	361
	<i>Jan Hjelmqvist</i>	
17.	Food Irradiation—An Emerging Technology	375
	<i>James H. Moy</i>	
18.	Ultraviolet Light and Food Preservation	405
	<i>Aurelio López-Malo and Enrique Palou</i>	
19.	Microbial Inactivation by Ultrasound	423
	<i>Santiago Condón, Javier Raso, and Rafael Pagán</i>	
20.	Use of Magnetic Fields as a Nonthermal Technology	443
	<i>Gustavo V. Barbosa-Cánovas, Barry G. Swanson, M. Fernanda San Martín G., and Federico Harte</i>	
21.	Nonthermal Technologies in Combination with Other Preservation Factors	453
	<i>Javier Raso, Rafael Pagán, and Santiago Condón</i>	

22.	<i>Sous Vide</i> /Freezing Technology for Ready Meals <i>F.S. Tansey and T.R. Gormley</i>	477
23.	Advances in Ohmic Heating and Moderate Electric Field (MEF) Processing <i>Sudhir K. Sastry</i>	491
24.	Radio-Frequency Heating in Food Processing <i>Juming Tang, Yifen Wang, and T.V. Chow Ting Chan</i>	501
25.	Current State of Microwave Applications to Food Processing <i>Pedro Fito, Amparo Chiralt, and M. Eugenia Martín</i>	525
26.	Supercritical Fluid Extraction: An Alternative to Isolating Natural Food Preservatives <i>Guillermo Reglero, F. Javier Señoráns, and Elena Ibáñez</i>	539
27.	Modeling Systems and Impact on Food Microbiology <i>Gail Betts and Linda Everis</i>	555
28.	Predictive Microbiology and Role in Food Safety Systems <i>Antonio Martínez, Miguel Rodrigo, Dolores Rodrigo, Pilar Ruiz, Amaury Martínez, and Ma. José Ocio</i>	579
29.	Experimental Protocols for Modeling the Response of Microbial Populations Exposed to Emerging Technologies: Some Points of Concern <i>Stella M. Alzamora, Sandra Guerrero, Pascual E. Viollaz, and Jorge Welti-Chanes</i>	591
30.	Application of Artificial Intelligence to Predictive Microbiology <i>Rosa María García-Gimeno, César Hervás-Martínez, and Gonzalo Zurera-Cosano</i>	609
31.	Growth/No-Growth Interface Modeling and Emerging Technologies <i>Enrique Palou and Aurelio López-Malo</i>	629
32.	Calculating Microbial Inactivation During Heat Treatments Without <i>D</i> and <i>Z</i> Values <i>Micha Peleg</i>	653
33.	Safety and Quality in the Food Industry <i>María S. Tapia, Ivelio Arispe, and Amaury Martínez</i>	669
	<i>Index</i>	681
