
Contents

Foreword	v
Preface.....	vii
Chapter 1 Introduction	1
1.1 Food Processing Industries	1
1.1.1 Canned and Bottled Fruits and Vegetables	2
1.1.2 Beer	4
1.1.3 Ciders	5
1.1.4 Soft Drinks.....	6
1.1.5 Sugar.....	7
1.1.6 Jams and Jellies.....	8
1.1.7 Black Tea.....	9
1.2 Introduction to Process Instrumentation and Control	10
1.2.1 An Industrial Process	11
1.2.2 Process Parameters	13
1.2.3 Batch and Continuous Processes.....	14
1.2.4 Process Instrumentation and Control	14
1.2.5 Selection of Controller.....	22
1.3 Conclusion.....	2 4
Chapter 2 Measuring and Controlling Devices	27
2.1 Role of Transducers in Food Processing.....	28
2.2 Classification of Transducers	30
2.2.1 Self-Generating Type	30
2.2.2 Variable Parameter Type.....	30
2.2.3 Pulse or Frequency Generating Types.....	32
2.2.4 Digital Transducers.....	32
2.3 Self-Generating Transducers	33
2.3.1 Piezoelectric Transducers	33
2.3.2 Thermocouples	36
2.3.3 Photoelectric Transducers	41
2.3.4 Magneto-Electric Transducer.....	44
2.3.5 Radioactive Transducer	47
2.4 Variable Parameter Type	51
2.4.1 Resistive Transducer	51
2.4.2 Inductive Transducers	72
2.4.3 Capacitive Transducer	77

2.5	Digital Transducers	80
2.5.1	Direct Digital Encoder.....	80
2.5.2	Frequency, Pulse Encoder.....	80
2.5.3	Analog-to-Digital Encoder.....	81
2.5.4	Analog-to-Digital Converter	81
2.5.5	Digital Encoders	82
2.6	Selection of Transducers.....	83
2.7	Actuating and Controlling Devices.....	84
2.7.1	Actuators	8 5
2.7.2	Actuating Motors	88
2.7.3	Final Control Elements.....	96
2.7.4	Pneumatic Control Devices.....	98
2.8	Conclusion	103

Chapter 3 Measurements in Food Processing105

3.1	Introduction	108
3.2	Moisture Content Measurement	109
3.2.1	Role of Moisture Content in Quality of Food	109
3.2.2	Microwave Absorption Method	111
3.2.3	Radio Frequency (RF) Impedance Technique	113
3.2.4	DC Resistance Technique.....	116
3.2.5	Infrared Technique.....	122
3.3	Moisture Release During Drying of Food.....	124
3.3.1	Mathematical Representation.....	124
3.3.2	Mechanical Loading Arrangement.....	125
3.3.3	Measuring Circuit	127
3.4	Humidity in the Food Processing Environment	129
3.4.1	Definition of Humidity	130
3.4.2	Conventional Types.....	131
3.4.3	Electrical Type of Humidity Meters.....	134
3.4.4	Electronic Wet- and Dry-Bulb Hygrometer	135
3.5	Turbidity and Color of Food	139
3.5.1	Turbidity Measurement.....	139
3.5.2	Food Color Measurement.....	143
3.6	Food and Process Temperature Measurement	152
3.6.1	Temperature Measurement in Food Processing.....	152
3.6.2	Thermocouples	153
3.6.3	Temperature of Food on a Conveyor	155
3.6.4	Food Tempering Monitoring.....	155
3.6.5	Precision Temperature Measurement	156
3.7	Food Flow Metering.....	157
3.7.1	Magnetic Flow Meters.....	158
3.7.2	Mass Flow Metering	159
3.7.3	Turbine Flow Meter	162
3.7.4	Positive Displacement Flow Meter	162

3.7.5	Solid Flow Metering.....	162
3.7.6	Gravimetric Feeder Meters.....	163
3.8	Viscosity of Liquid Foods.....	165
3.8.1	Definition and Units.....	165
3.8.2	Newtonian and Non-Newtonian Food Flow.....	166
3.8.3	Laboratory Type Saybolt Viscometer.....	169
3.8.4	Capillary Tube Viscometer.....	170
3.8.5	On-line Variable Area or Rotameter Type Viscometer.....	172
3.8.6	Rotating Cylinder Viscometer.....	174
3.9	Brix of Food.....	177
3.9.1	Brix Standards.....	179
3.9.2	Refractometers.....	179
3.10	pH Values of Food.....	183
3.10.1	pH Scale.....	183
3.10.2	pH Electrodes and Potential.....	184
3.10.3	pH Signal Processing.....	187
3.10.4	Ion-Sensitive Field Effect Transistor pH Sensors.....	187
3.11	Food Enzymes.....	193
3.11.1	Importance of Food Enzyme Detection.....	193
3.11.2	Enzyme Sensors.....	193
3.11.3	Measuring Circuit.....	196
3.11.4	Semiconductor Enzyme Sensor.....	198
3.11.5	Applications in Food Processing.....	199
3.12	Flavor Measurement.....	200
3.12.1	Sources of Flavor in Food.....	200
3.12.2	Physiology of Human Olfaction.....	201
3.12.3	Organoleptic Panel.....	202
3.12.4	Electronic Nose.....	203
3.12.5	Sensor Types.....	204
3.12.6	The Signal Processing and Pattern Recognition.....	207
3.12.7	Applications of the Electronic Nose in Food Processing.....	209
3.13	Food Texture and Particle Size.....	219
3.13.1	Electromechanical Measuring Techniques.....	220
3.13.2	Fluorescence Technique for Beef Toughness Detection.....	224
3.13.3	Machine Vision Technique.....	226
3.13.4	Particle Size Detection.....	230
3.14	Food Constituents Analysis.....	231
3.14.1	Carbonates, Bicarbonates, and Organic Matters in Bottled Water.....	232
3.14.2	Volatile Compounds in Tropical Fruits.....	234
3.14.3	Moisture, Protein, Fat, and Ash Content of Milk Powder.....	235
3.14.4	Components in Alcoholic Beverages.....	235
3.14.5	Quality Parameters in Cereals and Cereal Products.....	236
3.14.6	Meat Content.....	237
3.14.7	Bacteria and Foreign Body Detection.....	238
3.15	Conclusion.....	240

Chapter 4	Controllers and Indicators	243
4.1	Introduction	244
4.2	Temperature Control in Food Dehydration and Drying	245
4.2.1	Control Parameters for Heat and Mass Transfer in Drying	246
4.2.2	Feedback and Feedforward Control in Dryers	249
4.2.3	A Single-Input, Single-Output (SISO) Dryer Model	251
4.2.4	A Multiple-Input, Multiple-Output (MIMO) Dryer Model.....	252
4.2.5	Feedforward Control in the Food Dryer.....	255
4.3	Electronic Controllers.....	258
4.3.1	On-Off Controller	260
4.3.2	Controller Modes	261
4.3.3	Fan Direction Control in Food Withering.....	265
4.3.4	Cooling Surface Area Control in Chocolate Tempering.....	271
4.4	Flow Ratio Control in Food Pickling Process.....	271
4.4.1	Ratio Controller.....	272
4.4.2	Control Valves.....	273
4.5	Atmosphere Control in Food Preservation	277
4.5.1	Control Scheme.....	277
4.6	Timers and Indicators in Food Processing.....	278
4.6.1	Rolling Program in Tea Manufacturing.....	279
4.6.2	Temperature Indicator for Tea Dryer.....	284
4.7	Food Sorting and Grading Control	287
4.7.1	Objective of Sorting	287
4.7.2	Various Sorting Techniques	288
4.7.3	Automated Packaging and Bottling.....	289
4.8	Discrete Controllers.....	290
4.8.1	Ladder Diagram	291
4.8.2	Programmable Logic Controllers	292
4.9	Adaptive and Intelligent Controllers	293
4.9.1	Self-Tuning Controllers	294
4.9.2	Model Reference Adaptive Controllers	295
4.9.3	Intelligent Controllers.....	296
4.10	Conclusion	300
Chapter 5	Computer-Based Monitoring and Control.....	303
5.1	Introduction	304
5.2	Importance of Monitoring and Control with Computers	304
5.3	Hardware Features of a Data Acquisition and Control Computer...	305
5.4	Remote Data Acquisition with PCs.....	306
5.4.1	Analog Signal Interfacing Card	308
5.4.2	Connector Arrangements.....	308
5.5	Signal Interfacing.....	310
5.5.1	Input Signal Processing.....	310
5.5.2	Output Signal Processing	312

5.5.3	Interface Standards	312
5.5.4	Analog and Digital Signal Conversion	314
5.5.5	Interface Components	318
5.6	Examples of Computer-Based Measurement and Control in Food Processing	320
5.6.1	Computer-Based Monitoring and Control of the Withering Process in the Tea Industry	320
5.6.2	Computer-Based Sequential Timer for Tea Rollers	324
5.7	Conclusion	328
Appendixes.....		331
Appendix A: SI Units.....		331
Appendix B: English System of Units.....		332
Appendix C: CGS Systems of Units.....		332
Appendix D: Standard Prefixes		332
Appendix E: Piping and Instrumentation Drawing Sensor Designations		333
Appendix F: Standard Psychrometric Chart		334
Index.....		335
