
Table of Contents

SECTION 1

- 1 Physics of Color.....3
Horst A. Diehl

SECTION 2 Biochemistry of Color: Pigments

- 2.1 Chlorophylls: Properties, Biosynthesis, Degradation and Functions.....25
Ursula Maria Lanfer Marquez and Patricia Sinnecker
- 2.2 Carotenoids as Natural Colorants.....51
Semih Otles and Özlem Çagindi
- 2.3 Stability and Analysis of Phenolic Pigments71
Pierre Brat, Franck Tourniaire, and Marie Joskphe Amiot-Carlin
- 2.4 N-Heterocyclic Pigments: Betalains.....87
Florian C. Stintzing and Reinhold Carle
- 2.5 Other Natural Pigments101
Adela M. Pintea

SECTION 3 Pigment Stability, Bioavailability, and Impacts on Human Health

- 3.1 Plant Pigments as Bioactive Substances.....127
Marie Joskphe Amiot-Carlin, Caroline Babot-Laurent, and Franck Tourniaire

3.2	Bioavailability of Natural Pigments.....	147
	<i>Alexandrine During</i>	
3.3	Antioxidant and Prooxidant Actions and Stabilities of Carotenoids <i>In Vitro</i> and <i>In Vivo</i> and Carotenoid Oxidation Products	177
	<i>Catherine Caris-Veyrat</i>	

SECTION 4 Food Pigments: Major Sources and Stability during Storage and Processing

4.1	Chlorophylls in Foods: Sources and Stability.....	195
	<i>Ursula Maria Lanfer Marquez and Patricia Sinnecker</i>	
4.2	Carotenoids in Foods: Sources and Stability during Processing and Storage	213
	<i>Adriana Z. Mercadante</i>	
4.3	Anthocyanins in Foods: Occurrence and Physicochemical Properties	241
	<i>Adriana Z. Mercadante and Florinda O. Bobbio</i>	
4.4	Betalains in Food: Occurrence, Stability, and Postharvest Modifications	277
	<i>Florian C. Stintzing and Reinhold Carle</i>	

SECTION 5 Food Colorant Production

5.1	Updated Technologies for Extracting and Formulating Food Colorants	303
	<i>Carmen Socaciu</i>	
5.2	Food Colorants Derived from Natural Sources by Processing	329
	<i>Adela M. Pintea</i>	

7.2 Natural Pigments as Food Colorants583
Carmen Socaciu

7.3 Synthetic Colorants603
Adela M. Pintea
