FOREWORD	iii
CONTRIBUTORS	xiii
INTRODUCTION	xv
1 NATURAL COLOURS	1
1.1 Annato	3
1.1.1 Description	3
1.1.2 Colour shade	4
1.1.3 Source	4
1.1.4 Extraction	5
1.1.5 Physical characteristics	5
1.1.6 Applications	6
1.1.7 Physiological properties	7
1.1.8 Analytical methods	7
1.1.9 References	8
1.2 Anthocyanins	9
1.2.1 Description	9
1.2.2 Colour shade	10
1.2.3 Source	10
1.2.4 Physical characteristics	11
1.2.5 Applications	12
1.2.6 Physiological properties	13
1.2.7 Analytical Methods	14
1.2.8 References	14
1.3 β -Apo-8'-carotenal	17
1.3.1 Description	17
1.3.2 Colour shade	17
1.3.3 Source	18
1.3.4 Physical characteristics	18
1.3.5 Applications	19
1.3.6 Physiological properties	19
1.3.7 Analytical Methods	20
1.3.8 References	20
1.4 β -Carotene	21
1.4.1 Description	21
1.4.2 Colour shade	21
1.4.3 Source	22
1.4.4 Physical characteristics	22
1.4.5 Applications	23
1.4.6 Physiological properties	25

1.4.7	Analytical Methods	25
1.4.8	References	25
1.5	Mixed carotenes	27
1.5.1	Description	27
1.5.2	Colour shade	27
1.5.3	Source	28
1.5.4	Physical characteristics	28
1.5.5	Applications	28
1.5.6	Physiological properties	29
1.5.7	Analytical Methods	29
1.5.8	References	30
1.6	Beetroot Red	31
1.6.1	Description	31
1.6.2	Colour shade	32
1.6.3	Source	32
1.6.4	Physical characteristics	32
1.6.5	Applications	32
1.6.6	Physiological properties	33
1.6.7	Analytical Methods	33
1.6.8	References	33
1.7	Canthaxanthin	35
1.7.1	Description	35
1.7.2	Colour shade	35
1.7.3	Source	36
1.7.4	Physical characteristics	36
1.7.5	Applications	37
1.7.6	Physiological properties	37
1.7.7	Analytical Methods	37
1.7.8	References	38
1.8	Caramel	39
1.8.1	Description	39
1.8.2	Colour shade	39
1.8.3	Physical characteristics	39
1.8.4	Applications	40
1.8.5	Physiological properties	40
1.8.6	Analytical Methods	40
1.8.7	References	41
1.9	Carmine	43
1.9.1	Description	43
1.9.2	Colour shade	44
1.9.3	Source	44
1.9.4	Physical characteristics	44
1.9.5	Applications	44
1.9.6	Physiological properties	45
1.9.7	Analytical Methods	46
1.9.8	References	46
1.10	Chlorophyll	47
1.10.1	Description	47
1.10.2	Source	48
1.10.3	Physical characteristics	48
1.10.4	Applications	49

1.10.5	Physiological properties	49
1.10.6	Analytical Methods	49
1.10.7	References	49
1.11	Copper complexes of chlorophyllins	51
1.11.1	Description	51
1.11.2	Colour shade	52
1.11.3	Source	52
1.11.4	Physical characteristics	53
1.11.5	Applications	53
1.11.6	Physiological properties	55
1.11.7	Analytical Methods	55
1.11.8	References	55
1.12	Crocin	57
1.12.1	Description	57
1.12.2	Colour shade	57
1.12.3	Source	57
1.12.4	Physical characteristics	58
1.12.5	Applications	58
1.12.6	Physiological properties	59
1.12.7	Analytical Methods	59
1.12.8	References	60
1.13	Curcumin	61
1.13.1	Description	61
1.13.2	Colour shade	61
1.13.3	Source	62
1.13.4	Physical characteristics	62
1.13.5	Applications	62
1.13.6	Physiological properties	62
1.13.7	Analytical Methods	63
1.13.8	References	63
1.14	Ethyl ester of β -Apo-8'-carotenoic acid	65
1.14.1	Description	65
1.14.2	Colour shade	65
1.14.3	Source	66
1.14.4	Physical characteristics	66
1.14.5	Applications	67
1.14.6	Physiological properties	67
1.14.7	Analytical Methods	67
1.14.8	References	67
1.15	Lutein	69
1.15.1	Description	69
1.15.2	Colour shade	69
1.15.3	Source	70
1.15.4	Physical characteristics	70
1.15.5	Applications	71
1.15.6	Physiological properties	72
1.15.7	Analytical Methods	72
1.15.8	References	73
1.16	Lycopene	75
1.16.1	Description	75
1.16.2	Colour shade	75

1.16.3	Source	75
1.16.4	Physical characteristics	76
1.16.5	Applications	76
1.16.6	Physiological properties	76
1.16.7	Analytical Methods	76
1.16.8	References	77
1.17	Paprika	79
1.17.1	Description	79
1.17.2	Colour shade	79
1.17.3	Source	79
1.17.4	Physical characteristics	80
1.17.5	Applications	80
1.17.6	Physiological properties	81
1.17.7	Analytical Methods	81
1.17.8	References	81
1.18	Riboflavin	83
1.18.1	Description	83
1.18.2	Colour shade	83
1.18.3	Source	84
1.18.4	Physical characteristics	84
1.18.5	Applications	84
1.18.6	Physiological properties	84
1.18.7	Analytical Methods	84
1.18.8	References	85
2	SYNTHETIC COLOURS	87
2.1	Allura Red	89
2.1.1	Description	89
2.1.2	Colour shade	89
2.1.3	Physical characteristics	90
2.1.4	Applications	90
2.1.5	Physiological properties	90
2.1.6	Analytical Methods	90
2.1.7	References	91
2.2	Amaranth	93
2.2.1	Description	93
2.2.2	Colour shade	93
2.2.3	Physical characteristics	94
2.2.4	Applications	94
2.2.5	Physiological properties	94
2.2.6	Analytical Methods	95
2.2.7	References	95
2.3	Brilliant Black BN, Black PN	97
2.3.1	Description	97
2.3.2	Colour shade	97
2.3.3	Physical characteristics	97
2.3.4	Applications	98
2.3.5	Physiological properties	98
2.3.6	Analytical Methods	98
2.3.7	References	98
2.4	Brilliant Blue FCF	99

2.4.1	Description	99
2.4.2	Colour shade	99
2.4.3.	Physical characteristics	100
2.4.4	Applications	100
2.4.5	Physiological properties	100
2.4.6	Analytical Methods	100
2.4.7	References	100
2.5	Brown FK	103
2.5.1	Description	103
2.5.2	Colour shade	103
2.5.3.	Physical characteristics	103
2.5.4	Applications	103
2.5.5	References	103
2.6	Brown HT	105
2.6.1	Description	105
2.6.2	Colour shade	105
2.6.3.	Physical characteristics	105
2.6.4	Applications	106
2.6.5	Physiological properties	106
2.6.6	Analytical Methods	106
2.6.7	References	106
2.7	Carbon Black	107
2.7.1	Description	107
2.7.2	Colour shade	107
2.7.3	Source	107
2.7.4.	Physical characteristics	108
2.7.5	Applications	108
2.7.6	Physiological properties	108
2.7.7	Analytical Methods	109
2.7.8	References	109
2.8	Carmoisine	111
2.8.1	Description	111
2.8.2	Colour shade	111
2.8.3.	Physical characteristics	111
2.8.4	Applications	112
2.8.5	Physiological properties	112
2.8.6	Analytical Methods	112
2.8.7	References	112
2.9	Erythrosine	113
2.9.1	Description	113
2.9.2	Colour shade	113
2.9.3.	Physical characteristics	114
2.9.4	Applications	114
2.9.5	Physiological properties	114
2.9.6	Analytical Methods	115
2.9.7	References	115
2.10	Fast Green FCF	117
2.10.1	Description	117
2.10.2	Source	117
2.10.3.	Physical characteristics	118
2.10.4	Applications	118

2.10.5	Physiological properties	118
2.10.6	Analytical Methods	118
2.10.7	References	118
2.11	Green S	121
2.11.1	Description	121
2.11.2	Colour shade	121
2.11.3	Physical characteristics	122
2.11.4	Applications	122
2.11.5	Physiological properties	122
2.11.6	Analytical Methods	122
2.11.7	References	122
2.12	Indigotine, Indigo Carmine	125
2.12.1	Description	125
2.12.2	Colour shade	125
2.12.3	Physical characteristics	125
2.12.4	Applications	126
2.12.5	Physiological properties	126
2.12.6	Analytical Methods	126
2.12.7	References	126
2.13	Iron Oxides & Iron Hydroxides	129
2.13.1	Description	129
2.13.2	Colour shade	129
2.13.3	Source	130
2.13.4	Physical characteristics	130
2.13.5	Applications	130
2.13.6	Physiological properties	131
2.13.7	Analytical Methods	131
2.13.8	References	131
2.14	Litholrubine BK	133
2.14.1	Description	133
2.14.2	Colour shade	133
2.14.3	Physical characteristics	134
2.14.4	Applications	134
2.14.5	Physiological properties	134
2.14.6	Analytical Methods	134
2.14.7	References	134
2.15	Patent Blue V	135
2.15.1	Description	135
2.15.2	Colour shade	135
2.15.3	Physical characteristics	136
2.15.4	Applications	136
2.15.5	Physiological properties	136
2.15.6	Analytical Methods	136
2.15.7	References	136
2.16	Ponceau 4R	139
2.16.1	Description	139
2.16.2	Colour shade	139
2.16.3	Physical characteristics	140
2.16.4	Applications	140
2.16.5	Physiological properties	140
2.16.6	Analytical Methods	140

2.16.7	References	140
2.17	Quinoline Yellow	143
2.17.1	Description	143
2.17.2	Colour shade	143
2.17.3	Physical characteristics	143
2.17.4	Applications	144
2.17.5	Physiological properties	144
2.17.6	Analytical Methods	145
2.17.7	References	145
2.18	Sunset Yellow FCF	147
2.18.1	Description	147
2.18.2	Colour shade	147
2.18.3	Physical characteristics	148
2.18.4	Applications	148
2.18.5	Physiological properties	148
2.18.6	Analytical Methods	148
2.18.7	References	149
2.19	Tartrazine	151
2.19.1	Description	151
2.19.2	Colour shade	151
2.19.3	Physical characteristics	151
2.19.4	Applications	152
2.19.5	Physiological properties	153
2.19.6	Analytical Methods	153
2.19.7	References	153
2.20	Titanium Dioxide	155
2.20.1	Description	155
2.20.2	Colour shade	155
2.20.3	Source	155
2.20.4	Physical characteristics	156
2.20.5	Applications	156
2.20.6	Physiological properties	156
2.20.7	Analytical Methods	156
2.20.8	References	157
3	LEGISLATION	159
3.1	European Community Legislation	161
3.2	UK Legislation	166
3.3	USA Legislation	167
3.4	Other International Legislation	169
