	Page
PREAMBLE	1
I. GENERAL CONSIDERATIONS	
1. Introduction	3
2. Mechanism of Processes Involved	4
3. Deterioration of Fats, Oils and Fat-containing Foods	6
4. Action of Antioxidants in Fats and Oils	11
5. Selection of Antioxidants	15
6. Measurements of Oxidative and Organoleptic Stability, and of Antioxidant Efficacy	17
II. MONOGRAPHS	
Antioxidants	
- Ascorbic acid, sodium ascorbate	25
- Ascorbyl palmitate	38
- Isoascorbic acid, sodium isoascorbate	47
- Butylated hydroxyanisole (BHA)	52
- Butylated hydroxy-toluene	69
- Propyl gallate, octyl gallate, dodecyl gallate	82
- Thiodipropionic acid, dilauryl thiodipropionate	93
- Tocopherols, -tocopherol, mixed tocopherol Concentrate	98
Synergists	
- Citric acid	110
- Ethylen diaminetetraacetate, calcium disodium	121
- Isopropyl citrate, stearyl citrate	128
- Phosphoric acid	132
- Tartaric acid	135
REFERENCES	138
