

CONTENTS

INTROCUPTION	3
ALLOCATION OF LINITIS OF INTAKE	5
TOXICOLOGICAL EVALUATION: SOME FOOD CONTAMINANTS	7
TOXICOLOGICAL EVALUATON: MISCELLANEOUS FOOD ADDITIVES	8
METHODS OF ANALYSIS	9
THE MONOGRAPHS	
MERCURY	
Sources	11
Transformation of mercury from inorganic to organic	13
Methods of analysis	14
Levels in food	15
Biological data	17
Effects of mercury	17
Observations in man	20
Animal studies	22
Reproduction studies	24
Mutagenic studies	24
Assessment of hazard to man	25
Evaluation	28
LEAD	
Sources	34
Methods of analysis	37
Biological data	38
Intake, absorption and retention	38
Lead toxicity	38
Poisoning	42
Investigations on lead exposure	44
Short-term studies	44
Long-term studies	44
Evaluation	45
CADMIUM	
Occurrence and main uses	51
Agricultural uses	51
Analytical methods	51
Sources of intake	52
Observations in man	53
Effects of exposure	54
Cardiovascular and testicular lesions	55
Carcinogenicity studies	55

Comments	56
Evaluation	56
AMARANTH	60
DIETHYL PYROCARBONATE	67
n-OCTYL GALLATE	75
ANNEX 1. Reports and other documents resulting from pervious meeting of the Joint FAO/WHO Expert Committee on Food Additives	79
ANNEX 2. Membership of the Sixteenth Joint FAO/WHO Expert Committee on Food Additives	83
