

## CONTENTS

History of the food Sanitation Law and the Standards of Food Additives	1
Preface	4
Contributors of establishment of the Japanese Standards of Food Additives	13
Principle for the Use of Food Additives	16
Restriction for the Use of Food Additives	17
Standards for Labeling	40
Standards for Manufacturing	42
General Notice	43
Monographs (Alphabetical Arrangement of the Items)	49
General Tests and Apparatus	537
1. Limit Tests for Chloride and Sulfate	537
2. Flame Tests	538
3. Thermometers	539
4. Identification Tests	539
5. Gas Chromatography	548
6. Loss on Drying and Loss on Ignition	550
7. Spectrophotometry	550
8. Congealing Temperature	553
9. Residue on Ignition	555
10. Refractive Index	556
11. Heavy Metals Test	556
12. Water Determination	557
13. Infrared Spectrophotometry	560
14. Optical Rotation	562
15. Nitrogen Assay	563
16. Lead Limit Test	567
17. Softening Point	568

18. Viscosity	570
19. Thin Layer Chromatography	572
20. Quantitative Test for Generated Gas	573
21. pH Determination	575
22. Specific Gravity	579
23. Arsenic Test	581
24. Boiling or Distillation Range	584
25. Methoxyl Determination	590
26. Assay of Alkali Salts of Organic Acids	592
27. Melting Range or Temperature	592
28. Readily Carbonizable Substances	595
29. Paper Chromatography	595
30. Paper Electrophoresis	599
Coloring Matter Tests	602
Coloring Matter Aluminum Lake Tests	607
Flavoring Agent Tests	611
Reagents, Test Solution, Volumetric Solution, Standard Solution, Reference Standards, Filter Papers, Glass Filters and Sieves	616
Reagents	617
Test Solution	638
Volumetric Solutions	654
Standard Solutions	664
Reference Standards	670
Filter Papers	671
Glass Filters	673
Sieves	673
Bertrand Table	674
Atomic Weights	676
