

CONTENTS

Preface	ix
---------	----

PERSPECTIVES

1. Legislative and Consumer Perception of Biologically Generated Aroma Chemicals	2
2. Biogenesis of Aromas: An Industrial Perspective	11
3. Legal and Scientific Issues Arising from Corporate-Sponsored University Research in Biotechnology: Considerations for Negotiating Research and Licensing Agreements	18

ANALYTICAL METHODOLOGY

4. Sample Preparation Techniques for Gas-Liquid Chromatographic Analysis of Biologically Derived Aromas	34
5. Advances in the Separation of Biological Aromas	53
6. Changes in Aroma Concentrates during Storage	65
7. Isolation of Nonvolatile Precursors of β -Damascenone from Grapes Using Charm Analysis	75
8. Precursors of Papaya (<i>Carica papaya</i> , L.) Fruit Volatiles	85
9. Volatile Compounds from Vegetative Tobacco and Wheat Obtained by Steam Distillation and Headspace Trapping	99

BIOSYNTHETIC PATHWAYS

10. Biogenesis of Aroma Compounds through Acyl Pathways	114
11. Biosynthesis of Cyclic Monoterpenes	134
12. Carotenoids: A Source of Flavor and Aroma	157
13. Fatty Acid Hydroperoxide Lyase in Plant Tissues: Volatile Aldehyde Formation from Linoleic and Linolenic Acid	167
14. Enzymic Formation of Volatile Compounds in Shiitake Mushroom (<i>Lentinus edodes</i> Sing.)	176
15. Biogenesis of Blackcurrant (<i>Ribes nigrum</i>) Aroma	184
16. Volatile Compounds from Wheat Plants: Isolation, Identification, and Origin	193
17. Enzymic Generation of Volatile Aroma Compounds from Fresh Fish	201

METABOLISM OF SPECIFIC COMPOUNDS

18. Role of Monoterpenes in Grape and Wine Flavor	222
19. Metabolism of Linalool by <i>Botrytis cinerea</i>	243
20. Selective Production of Ethyl Acetate by <i>Candida utilis</i>	254
21. Synthesis of 2-Methoxy-3-alkylpyrazines by <i>Pseudomonas Perolens</i>	266
22. Regulation of Acetaldehyde and Ethanol Accumulation in Citrus Fruit	275
23. Enzymic Generation of Methanethiol To Assist in the Flavor Development of Cheddar Cheese and Other Foods	286

BIOGENERATION OF SELECTED AROMAS

24. Generation of Flavor and Aroma Components by Microbial Fermentation and Enzyme Engineering Technology	310
25. Generation of Flavor and Odor Compounds through Fermentation Processes	323
26. Production of Secondary Metabolites in Plant Cell Cultures	347
27. Essential Oil Production: A Discussion of Influencing Factors	363
28. Production of a Romano Cheese Flavor by Enzymic Modification of Butterfat	370

SUMMARY

29. Biogenesis of Aromas: In Summation	380
Author Index	387
Subject Index	387
