

<u>TABLE OF CONTENTS</u>	Page
INTRODUCTION.....	iii
SPECIFICATIONS.....	1
Aluminium potassium sulfate.....	3
Aluminium sodium sulfate.....	6
Aluminium sulfate (anhydrous).....	8
Amaranth	10
Ammonium chloride.....	12
Aspergillus awamori var./Carbohydrase.....	14
Aspergillus niger var./Catalase.....	15
Aspergillus oryzae var./Carbohydrase.....	16
Aspergillus oryzae var./Protease.....	17
Bacillus coagulans var./Glucose isomerase.....	18
Bacillus licheniformis var./Carbohydrase.....	19
Beet Red.....	20
Brilliant Black FN.....	23
Dl-Calcium malate.....	25
Chlorophyllin copper complex. sodium and potassium salts.....	28
Diocetyl sodium sulfosuccinate.....	30
Iron Oxides (Iron Oxide black).....	34
Iron Oxides (Iron Oxide Red).....	35
Iron Oxides (Iron Oxide Yellow).....	36
Klebsiella aerogenes var./Carbohydrase.....	37
Magnesium chloride.....	38
Magnesium gluconate.....	40
Magnesium hydrogen carbonate.....	42
Magnesium lactate.....	44
Nitrous oxide.....	46
Potassium chloride.....	50
Potassium dihydrogen citrate.....	52

	Page
Potassium gluconate.....	54
Dl-Potassium malate solution.....	56
Sodium dihydrogen citrate	58
Sodium fumarate	60
Sodium gluconate	62
Dl-Sodium malate	64
Sodium thiosulfate	66
Stannous chloride.....	68
Streptomyces olivaceus var./Glucose isomerase	70
Streptomyces violaceoniger var./Glucose isomerase	71
Triammonium citrate	72
Annex 1 Methods for iron oxides	74
Annex 2 Method of glucose isomerase activity (tentative) (for enzyme preparations intended for continued flow production processing).....	77
Annex 3 Method of glucose isomerase activity (tentative) (for enzyme preparations intended for batch-isomerization production processing).....	84
Annex 4 Method for examination of enzyme preparations: Pullulanase activity (tentative).....	88

CONTENTS BY MAJOR FUNCTIONAL USES

Page

I. FOOD COLOURS

Amaranth	10
Beet Red	20
Brilliant Black PN	23
Chlorophyllin copper complex, sodium and potassium salts	28
Iron oxide black	34
Iron oxide red	35
Iron oxide yellow	36
Annex 00 Methods for iron oxides	74

II. ENZYME PREPARATIONS

Carbohydrase/Aspergillus awamori var.....	14
Carbohydrase/Aspergillus oryzae var.	16
Carbohydrase/Bacillus licheniformis var.....	19
Carbohydrase/Klebsiella aerogenes var.....	37
Catalase/Aspergillus niger var.....	15
Glucose isomerase/Bacillus coagulans var.	18
Glucose isomerase/Streptomyces olivaceus var.	70
Glucose isomerase/Streptomyces violaceoniger var.....	71
Protease/Aspergillus oryzae var.....	17
Annexes Methods of examination of enzyme preparations: 2 and 3, Glucose isomerase activity	77
Annex 4, Methods for examination of enzyme preparations: Pullulanase activity	88

III. MISCELLANEOUS FOOD ADDITIVES

Aluminium potassium sulfate	3
Aluminium sodium sulfate	6
Aluminium sulfate	8
Ammonium chloride	12

	Page
DL-Calcium malate	25
Dioctyl sodium sulfosuccinate	30
Magnesium hydrogen carbonate	42
Magnesium chloride	38
Magnesium gluconate	40
Magnesium lactate	44
Nitrous oxide	46
Potassium chloride	50
Potassium dihydrogen citrate	52
Potassium gluconate	54
DL-Potassium malate solution	56
Sodium dihydrogen citrate	58
Sodium fumarate	60
Sodium gluconate	62
DL-Sodium malate	64
Sodium thiosulfate	66
Stannous chloride	68
Triammonium citrate	72
