

## CONTENTS

List of contributors	ix
1 Introduction	1
<b>Part I The auditing process</b>	<b>3</b>
2 Food standards and auditing	5
2.1 Introduction: why have standards become so important?	5
2.2 What are standards?	6
2.3 Standards and specifications	8
2.4 Increasing importance of HACCP based Codex standards (GATT)	11
2.5 European Union standards	12
2.6 UK Food Safety Act	13
2.7 The need for audit	14
2.8 List of useful websites	14
2.9 References	16
Appendix: Example taken from GMP Manual	16
<b>3 What auditors look for: a retailer's perspective</b>	<b>18</b>
3.1 Introduction	18
3.2 Routine auditing: new suppliers	19
3.3 Routine auditing: existing suppliers	236
3.4 Non-routine auditing	23
3.5 Summary	28
<b>4 Regulatory verification of safety and quality control systems in the food industry</b>	<b>29</b>
4.1 Introduction: the role of safety and quality control systems in the food industry	29
4.2 The principles of an effective food safety and quality control system	30
4.3 The role of government and industry in achieving food safety and quality	38

4.4	Regulatory verification versus audit	39
4.5	Regulatory verification of industry food safety and quality control systems	42
4.6	The Canadian approach	47
<b>Part II Safety and quality</b>		<b>53</b>
<b>5</b>	<b>Assessing supplier HACCP systems: a retailer's perspective</b>	<b>55</b>
5.1	Introduction	55
5.2	Retailers and the development of supplier HACCP systems	55
5.3	Assessing supplier HACCP systems: routine audits	57
5.4	Non-routine audits: the use of customer complaint data analysis	59
5.5	Common weaknesses in HACCP systems	60
5.6	The future development of HACCP	64
5.7	Conclusions	68
<b>6</b>	<b>TQM systems</b>	<b>70</b>
6.1	Introduction	70
6.2	The scope of a quality system	74
6.3	Developing a quality system	76
6.4	Implementation	83
6.5	Performance measuring and audition	87
6.6	Benefits	89
6.7	Future trends	90
6.8	References	91
<b>7</b>	<b>Auditing HACCP-based quality systems</b>	<b>92</b>
7.1	Introduction	92
7.2	HACCP and quality systems	94
7.3	Establishing benchmarks for auditing	96
7.4	What the auditor should look for	106
7.5	Future trends	107
7.6	References	109

<b>8</b>	<b>Laboratories and analytical methods: quality control</b>	<b>111</b>
8.1	Introduction	111
8.2	Legislative requirements	112
8.3	FSA surveillance requirements	115
8.4	Laboratory accreditation and quality control	115
8.5	Proficiency testing	122
8.6	Analytical methods	127
8.7	Standardised methods of analysis for contaminants	131
8.8	Conclusion and future trends	135
8.9	References	137
	Appendix: Information for potential contractors on the analytical quality assurance requirements for food chemical surveillance exercises	138
	<b>Part III Other types of audit</b>	<b>145</b>
<b>9</b>	<b>Benchmarking</b>	<b>147</b>
9.1	Introduction	147
9.2	Basic principles of benchmarking	149
9.3	Understanding your organisation and its processes	153
9.4	Identifying potential benchmarking partners	157
9.5	Preparing for a benchmarking visit	159
9.6	Analysis and improvement	161
9.7	Review	164
9.8	Managing the benchmarking process	165
9.9	Sources of further information and advice	169
9.10	Further reading	172
<b>10</b>	<b>Environmental audits and life cycle assessment</b>	<b>174</b>
10.1	Introduction	174
10.2	Environmental legislation	175
10.3	Environmental management systems (EMS)	176
10.4	Auditing on EMS	177
10.5	Other environmental assessment methods	181

10.6 Introduction to LCA	182
10.7 The food life cycle	187
10.8 Case studies	190
10.9 The benefits of LCA	191
10.10 Future trends in LCA	192
10.11 References	193
<b>11 Auditing organic food processors</b>	<b>195</b>
11.1 Introduction	195
11.2 Defining organic food processing	195
11.3 Certification and the auditing process	200
11.4 What auditors look for (on site at an inspection)	203
11.5 Summary and future trends	209
11.6 References	210
Index	211
