

## CONTENTS

### PART 1

#### Practical Aspects of Gas Chromatography

|   |    |
|---|----|
| 1 The Apparatus                               | 3  |
| 2 Columns                                     | 13 |
| 3 Detectors                                   | 43 |
| 4 Sampling and Sample Derivatisation          | 61 |
| 5 Reaction Chromatography                     | 78 |
| 6 Interpretation of Results                   | 87 |
| 7 Other Identification and Related Techniques | 93 |

### PART 2

#### Recommendations

|   |     |
|---|-----|
| 8 Recommended Methods and Stationary Phases | 103 |
|---|-----|

### PART 3

#### Food Composition

|   |     |
|---|-----|
| 9 Dairy Products                                  | 137 |
| 10 Fats and Oils                                  | 154 |
| 11 Meat, Fish and Eggs                            | 177 |
| 12 Essential Oils                                 | 192 |
| 13 Fruits, Vegetables and Non-alcoholic Beverages | 209 |
| 14 Alcoholic Beverages and Vinegar                | 234 |
| 15 Sugar Products and Syrups                      | 255 |
| 16 Cereals and their Products                     | 265 |

### PART 4

#### Food Additives

|                                   |     |
|-----------------------------------|-----|
| 17 Preservatives and Antioxidants | 279 |
| 18 Emulsifiers and Stabilisers    | 295 |
| 19 Other Food Additives           | 305 |

### PART 5

#### Food Contaminants

|   |     |
|---|-----|
| 20 Pesticides   | 321 |
| 21 Other Food Contaminants                                      | 347 |
| Appendix 1 Some GC Liquid Stationary Phases and Equivalents     | 373 |
| Appendix 2 Some GC Support Materials and Equivalents            | 375 |
| Appendix 3 Common Names of Fatty Acids and their Carbon Numbers | 376 |
| Index   | 379 |
