

SUMMARY OF CONTENTS

	<u>Pages</u>
1. INTRODUCTION	1
2. INTERNATIONAL REFER= METHODS OF ANALYSIS	2
3. METHODS OF ANALYSIS FOR TRACES OF CAINII13M	5
3.1 Comment	5
3.2 Referee Method	5
3.3 Other Methods	6
3.4 Sampling Method	6
4• METHODS OF ANALYSIS FOR TRACES OF LEAD	7
4.1 Comment	7
4.2 Referee Method	7
4.3 Other Methods	8
5. METHODS OF ANALYSIS FOR TRACES OF MERCURY AND ORGANCKERCURY COMPOUNDS	9
5.1 Comment	9
5.1.1 Total Mercury	
5.1.2 Metbyl mercury compounds	9
5.2 Referee Method	10
5•3 Other Methods	10
5.4 Sampling	10
6. METHODS OF ANALYSIS AND SAMPLING FOR ORGANOC\$LORINE AND PMYCBLORINATEIIPHEM CADS	11
6.1 Comment	11
6.2 Referee Method	12
6.3 Other Methods	13
6.4 Sampling	13

7. METHODS ON ANALYSIS AND SAMPLING FOR AFLATOXINS	15
7.1 Comment	15
7.2 Referee Methods	15
7.2.1 Peanut and Peanut products	15
7.2.2 Cottonseed and, Cottonseed products	16
7.2.3 Corn, Soyabean	16
7.2.4 Copra, Copra Meal, Coconut	16
7.2.5 Tree nuts	16
7.2.6 Milk	17
7.2.7 Cocoa Beans	17
7.2.8 Other Products	17
7.3 Screening Method	17
7.4 Sampling Methods	18
8. SUGGESTIONS FOR FURTHER WORK	19
8.1 General Considerations	19
8.2 Need for Inter-comparison and Collaborative Studies	19
9. SUMMARY TABLE	19
10. RECOMMENDATIONS	20

APPENDIXES

I. Participants	21
II. A critical examination of the concept of Codex "referee" methods of analysis and sampling	23
III. General consideration on the desirability, the scope and the acceptability of International Referee Methods for Contaminants in Food	25
IV. Statistical Parameters	33
V. Summary table	34
VI. List of working documents for the Meeting	37
