

Contents

<i>Preface</i>	v
<i>Contributors</i>	ix
1. Solvent Extraction and Distillation Techniques <i>Thomas Parliment</i>	1
2. Analysis of Food Volatiles Using Headspace-Gas Chromatographic Techniques <i>Thomas P. Wampler</i>	25
3. The Analysis of Food Volatiles Using Direct Thermal Desorption <i>Casey C. Grimm, Steven W. Lloyd, James A. Miller, and Arthur M. Spanier</i>	55
4. Solid-Phase Microextraction for the Analysis of Aromas and Flavors <i>Alan D. Harmon</i>	75
5. The Advantages of GC-TOFMS for Flavor and Fragrance Analysis <i>John F. Holland and Ben D. Gardner</i>	107

6.	Modern Methods for Isolating and Quantifying Volatile Flavor and Fragrance Compounds <i>Peter Werkhoff, Stefan Brennecke, Wilfried Bretschneider, and Heinz-Jürgen Bertram</i>	139
7.	SPME Comparison Studies and What They Reveal <i>Ray Marsili</i>	205
8.	Analysis of Volatile Compounds in the Headspace of Rice Using SPME/GC/MS <i>Casey C. Grimm, Elaine T. Champagne, and Ken'ichi Ohtsubo</i>	229
9.	Headspace Techniques for the Reconstitution of Flower Scents and Identification of New Aroma Chemicals <i>Thomas McGee and Kenneth L. Purzycki</i>	249
10.	SPME Applications in Consumer Products <i>Richard Payne, Allen E. Puchalski, and John Labows</i>	277
11.	Gas Chromatography–Olfactometry in Food Aroma Analysis <i>Imre Blank</i>	297
12.	Quantitative Use of Gas Chromatography–Olfactometry: The GC-“SNIF” Method <i>Alain Chaintreau</i>	333
13.	Combining Mass Spectrometry and Multivariate Analysis to Make a Reliable and Versatile Electronic Nose <i>Ray Marsili</i>	349
14.	Character Impact Compounds: Flavors and Off-Flavors in Foods <i>Robert J. McGorin</i>	375
	<i>Abbreviations</i>	415
	<i>Index</i>	419
