

CONTENTS

The Organization of Quality Control

1. Introduction	1
2. The Principles of Quality Control	4
3. The Application and Organization of Quality Control	7
4. Quality Control Problems and Techniques	25
5. The Future of Quality Control	31

Health Problems in Quality Control: Chemical Aspects

1. Some General Considerations	33
2. The Balance of Benefits and Risks	38
3. Assessment of the Potential Hazards	45
4. Quality Control as a Safety Measure	54
5. Administrative Aspects	60
6. Conclusion	63

Health Problems in Quality Control: Microbiological Aspects

1. Introduction	67
2. Intestinal Pathogens	72
3. Microbiological Limits	98
4. Conclusions	104

Statistical Methods in Quality Control

1. General Methods of Statistics	121
2. Sampling	173
3. Control Charts	208
4. The Estimation of Ingredients	219

Tasting Panels: Sensory Assessment in Quality Control

1. Introduction	235
2. Aims	237
3. Facilities	239
4. Organization of Tests	243
5. Some Common Test Designs	251
6. Special Techniques	270
7. Open Appraisal	271
8. Conclusion	274

Food Standards
Their Importance, Limitations and Problems
with Special Reference to International Work

1. Introduction	285
2. Why Standards?	286
3. Types of Standard	290
4. Enforcement	318
5. The International Codex Alimentarius Programme	324
6. The Preparation of Standards	339
7. Future Trends	348
