

CONTENTS

Water

1. Introduction	1
2. Analytical Data for Water used for Public Supply Purposes	2
3. Standards for Drinking Water	7
4. The Dairy Industry	10
5. The Fish Industry	11
6. Vegetables and Fruit (Fresh and Canned)	13
7. Frozen Desserts	15
8. Brewing	16
9. The Soft Drink Industry	17
10. Waste Waters from the Food Industries	20
11. Conclusion	25

Dairy Products

1. Introductory	29
2. Sampling of Dairy Products	31
3. Physical Methods	33
4. Chemical and Biochemical Methods	35
5. Microbiological Methods	38
6. Raw or Untreated Milk	52
7. Pasteurized Milk	75
8. Sterilized Milk	83
9. Aseptically Filled Milk	88
10. Flavoured Milks	91
11. Cream	93
12. Manufactured Products: General Considerations	96
13. Evaporated (Unsweetened) Milk	100
14. Sterile Concentrated Milk	103
15. Frozen Concentrated Milk	104
16. Sweetened Condensed Milk	105
17. Milk Powder or Dried Milk	110
18. Butter	119
19. Cheese	127
20. Cultured Milks	147
21. Other Dairy Products	151
22. Sensory Tests	154

23. Substances Added to Dairy Products	155
24. Packaging	157
25. Legal Aspects and Quality Standards	158
26. Cleanliness and Sterility of Equipment	162
27. Public Health Aspects	169

Flour and Bread

1. Introduction	195
2. Control of Flour Quality	198
3. Control of Bread Quality	212

Flour Confectionery

1. Introduction	219
2. Outline of Manufacturing Methods	221
3. Stages at which Control may be introduced	222
4. Physical Methods of Testing at Different Stages of Processing	238

Meat and Meat Products

1. Introduction	252
2. Assessment of Carcase Quality	254
3. Quality Characteristics	254
4. Factors Affecting Quality	258
5. Meat Inspection	264
6. Refrigeration	265
7. Meat Products	266
8. Comminuted Meat Products	268
9. Cured Meat Products	278
10. Canned Meat Products	283
11. Meat Pies	288
12. Poultry	290
13. Frozen Meat Meals	291
14. Packaging and Display	292
15. Conclusion	293

Fish and Fish Products

1. Introduction	303
2. The Various Aspects of Quality and its Measurement	306
3. The Application of the Principles of Quality Control to the Fish Industry	336

Edible Fats and Oils

1. Introduction	355
2. Composition of Fats	355
3. Wining and Refining of Fats	357
4. Classical, Chemical and Physical Methods for the Analysis of Fats	361
5. Modern Methods of Analysis	375
6. Fat Products	394
