

Contents

Preface	iii
1. Rapid Methods and Automation for Food Microbiology <i>Daniel Y. C. Fung</i>	1
2. Ion Chromatography for the Food Industry <i>Maurice R. Marshall, Ronald H. Schmidt, and Bridget L. Walker</i>	39
3. Gas Chromatography and Mass Spectrometry in Quality Control and Research <i>Gary A. Reineccius</i>	67
4. pH and Ion-Selective Electrodes <i>John Comer</i>	83
5. Modern Methods of Analyzing Mycotoxins in Foods <i>William G. Ikins</i>	117

- 6. Metal Detection Systems**
Alfred K. Frei
- 7. Machine Vision for Quality Control in the Food Industry** 167
N. Ronnie Sarkar
- 8. Color Measurement and Interpretation**
Frederick J. Francis
- 9. Viscosity Measurements of Foods**
Malcolm C. Bourne and M. A. Rao
- 10. An Introduction to Laboratory Robotics** 231
W. Jeffrey Hurst
- 11. Computer-Aided Quality Control and Research in Thermal Processing of Canned Foods** 251
Arthur A. Teixeira
- 12. Pattern Recognition Techniques for Food Research and Quality Assurance**
Ike J. Jeon
- Index 299
