

CONTENTS

Contributors	xi
Glossary of Technical Abbreviations	xiii
Chapter 1. Introduction—An Overview of Spectroscopic Methods	1
1.1. Spectroscopy and the Food Scientist	1
1.2. General Principles of Spectroscopy	2
1.3. Classification of Spectroscopic	5
1.4. Choice of Spectroscopic Method	11
References	11
Chapter 2. Near-Infrared Spectroscopy	13
2.1. Introduction	13
2.2. Spectroscopy of NIR	17
2.3. Instrumentation	26
2.4. Chemometrics	37
2.5. Applications	47
2.6. Trends and Future Prospects	52
References	52
Chapter 3. Mid-Infrared Spectroscopy	59
3.1. Introduction	59
3.2. Basic Principles	61
3.3. Future Developments	81
3.4. Instrumental Considerations	82
3.5. Conclusions	83
References	83
Chapter 4. Nuclear Magnetic Resonance Spectroscopy	87
4.1. Basic Principles	87
4.2. Water in Foods	100
4.3. Analytical Methods: From Low-to High-Resolution	119
4.4. Polysaccharides	128
4.5. Food Proteins and Other Components: Multinuclear Studies	135
References	138

Chapter 5. Analytical Spectroscopic Methods for the Determination of Metals in Foods	147
5.1. Nature of Metallic Elements in Foods	147
5.2. Instrumentation for Spectroscopic Determination of Metals	149
5.3. Preparation of Food Samples for Atomic Spectroscopy	156
5.4. Operational Parameters for Sample Analysis	161
5.5. Example of Spectroscopic Analysis of Foods for Metals	167
5.6. Discussion and Conclusion	176
5.7. Vendors of Instrumentation, Reagents, and Supplies	176
Bibliography	178
Chapter 6. Mass Spectroscopy	181
6.1. Introduction	181
6.2. Practical Considerations	182
6.3. Analysis of Food Components by Mass Spectrometry	195
6.4. Conclusions and Future Prospects	211
References	211
Chapter 7. Ultraviolet/Visible Light Methods	221
7.1. Introduction	221
7.2. Theory	221
7.3. Quantitative Measurements	223
7.4. Instrumentation	224
7.5. Sample Preparation	227
7.6. General Applications	228
7.7. Automation	236
7.8. Summary	239
References	239
Index	241
