<i>Preface and Acknowledgments</i>	vii		
<i>Notes on Calculations of Concentration</i>	ix		
1 Nutrition Labeling Using a Computer Program	1		
A Preparing Nutrition Labels for Sample Yogurt Formulas	3		
B Adding New Ingredients to a Formula and Determining How They Influence the Nutrition Label	4		
C An Example of Reverse Engineering in Product Development	5		
2 Assessment of Accuracy and Precision	9		
3 Determination of Moisture Content	17		
A Forced Draft Oven	19		
B Vacuum Oven	21		
C Microwave Drying Oven	22		
D Rapid Moisture Analyzer	22		
E Toluene Distillation	22		
F Karl Fischer	23		
G Near Infrared Analyzer	25		
4 Determination of Fat Content	29		
A Soxhlet Method	31		
B Goldfish Method	33		
C Mojonnier Method	34		
D Babcock Method	35		
5 Protein Nitrogen Determination	39		
A Kjeldahl Nitrogen Method	41		
B Nitrogen Combustion Method	43		
6 Phenol-Sulfuric Acid Method for Total Carbohydrates	47		
7 Vitamin C Determination by Indophenol Method	55		
8 Complexometric Determination of Calcium	61		
A EDTA Titrimetric Method for Testing Hardness of Water	63		
B Test Strips for Water Hardness	65		
9 Iron Determination in Meat Using Ferrozine Assay	69		
10 Sodium Determination Using Ion Selective Electrodes, Mohr Titration, and Test Strips	75		
A Ion Selective Electrodes	77		
B Mohr Titration	79		
C Quantab® Test Strips	81		
11 Sodium and Potassium Determinations by Atomic Absorption Spectroscopy and Inductively Coupled Plasma-Atomic Emission Spectroscopy	87		
12 Standard Solutions and Titratable Acidity	95		
A Preparation and Standardization of Base and Acid Solutions	97		
B Titratable Acidity and pH	99		
13 Fat Characterization	103		
A Saponification Value	105		
B Iodine Value	106		
C Free Fatty Acid Value	108		
D Peroxide Value	109		
E Thin-Layer Chromatography Separation of Simple Lipids	111		
14 Fish Muscle Proteins: Extraction, Quantitation, and Electrophoresis	115		
15 Enzyme Analysis to Determine Glucose Content	123		
16 Gliadin Detection in Food by Immunoassay	129		

-
- 17 Examination of Foods for Extraneous Materials 137
- A Extraneous Matter in Soft Cheese 140
 - B Extraneous Matter in Jam 140
 - C Extraneous Matter in Infant Food 141
 - D Extraneous Matter in Potato Chips 141
 - E Extraneous Matter in Citrus Juice 142
- 18 High Performance Liquid Chromatography 145
- A Determination of Caffeine in Beverages by HPLC 147
 - B Solid-Phase Extraction and HPLC Analysis of Anthocyanidins from Fruits and Vegetables 149
- 19 Gas Chromatography 155
- A Determination of Methanol and Higher Alcohols In Wine by Gas Chromatography 157
 - B Preparation of Fatty Acid Methyl Esters (FAMES), and Determination of Fatty Acid Profile of Oils by Gas Chromatography 159
- 20 Viscosity Measurement Using a Brookfield Viscometer 165
- 21 Calculation of CIE Color Specifications from Reflectance or Transmittance Spectra 171
