
Contents

<i>List of Contributors</i>	vii
1. Introduction to Food Formulation Engineering J.E. Norton, P.J. Fryer and I.T. Norton	1
2. Protein-Based Designs for Healthier Foods of the Future G. Keith Harris and E. Allen Foegeding	9
3. Design of Foods Using Naturally Structured Materials T.J. Foster	44
4. Designed Food Structures Based on Hydrocolloids B. Wolf	59
5. Formulation Engineering of Food Emulsions A.K. Pawlik, P.J. Fryer and I.T. Norton	82
6. The Physics of Eating P. Lillford	107
7. Design Structures for Controlled Manipulation of Flavour and Texture B.J.D. Le Révérend, O. Gouseti and S. Bakalis	136
8. Salt Reduction in Food T.B. Mills and I.T. Norton	163
9. Food Structures Designed for Oral Response/Flavour Release R. Linforth	174
10. The Colloidal State and its Relationship to Lipid Digestion M. Golding	196
11. Hydrocolloid Formulations Engineered for Properties in the GI Tract F. Spyropoulos and E. Nowak	233

12. Design of Food Structures for Consumer Acceptability	253
J.E. Norton	
13. Formulation Design to Change Food Habits	281
J.A. Harrold and J.C.G. Halford
